READ THIS BEFORE ORDERING

NO ORDER accepted for less than \$1.00 at these bargain prices.

PRICES given are for the quantities specified. 50 at 100 and 500 at 1,000 rates apply listed herein. 25 at 100 and 250 at 1,000 rates when orders amount to \$10 or more.

ALL SHIPMENTS are carefully packed in baskets, boxes or bales, for which

Be sure to state whether goods are to be shipped by mail, express or freight. portation companies, all goods are at the risk of the purchaser, and if any loss portation companies must be held responsible. All goods are delivered free to office.

TERMS CASH. Parties desiring goods sent C. O. D. must remit one-cash when sending in the order.

CLAIMS, if any, must be made within 10 days after receipt of the goods.

WE WARRANT our plants, trees, etc., to be true to label and if, after fruiting we will, on receipt of sufficient proof, return the original price paid for them; or we at the discretion of the purchaser. We exercise extreme care to have everything pure and than usual personal attention, and yet, now and then, a mixture will occur, in spite of the Beware of the dealer who says that he never has a complaint or a dissatisfied customer, such good for this earth.

Our New Combination Boarding House and Office, 30 by 52 feet. Basement used for Dining Room, Kitchen, Furnace Room and Cellar; First Floor all devoted for Offices. Second Floor contains nine Dormitories. Third Floor, storage and for overflow Sleeping. Complete Pressure Water System for bath, toilet, kitchen and fire protection. Hot Air Furnace.

PLANTS BY PARCEL POST. Plants and seeds now come under the parcel post zone system, same as all kinds of merchandise. It is impossible to figure out the exact postage on an order until it is packed, therefore we recommend that customers allow us to send their orders C. O. D. for the amount of postage. This will cost you 10 cents for the C. O. D., but is well worth the cost, as it practically insures your package against loss in the mails—no C. O. D. can be collected unless the package is delivered safe to the customer.

PLANTS BY EXPRESS AND FREIGHT. Express charges are now cheaper than parcel post rates on large packages when sent short distances, and on large and small packages beyond the fifth zone. We advise using the express where possible, as the parcel post is in many places overcrowded. When the weather is cool, in early spring and late fall, large orders can often be sent long distances by freight, at a great saving.

IMPORTANT. Our plants are mostly tied in bunches of 25 each. We cannot sell one dozen plants half the price of 25 plants. Please do not send us orders calling for one or two plants each of a long list of plants. It takes more time to assemble such orders than we get for them. Please order at least 25 plants unless they are priced in smaller lots. In nothing has the cost of production increased during the year more than it has in plants, etc. The prices here are made as low as we care to accept and

MONEY. We do not care how remittances are made if they can be readily turned into cash. We can deduct the cost of fee from your bill, if you send money by postoffice, express, registered letter or draft on New York. Address all orders and communications to

STRAWBERRIES

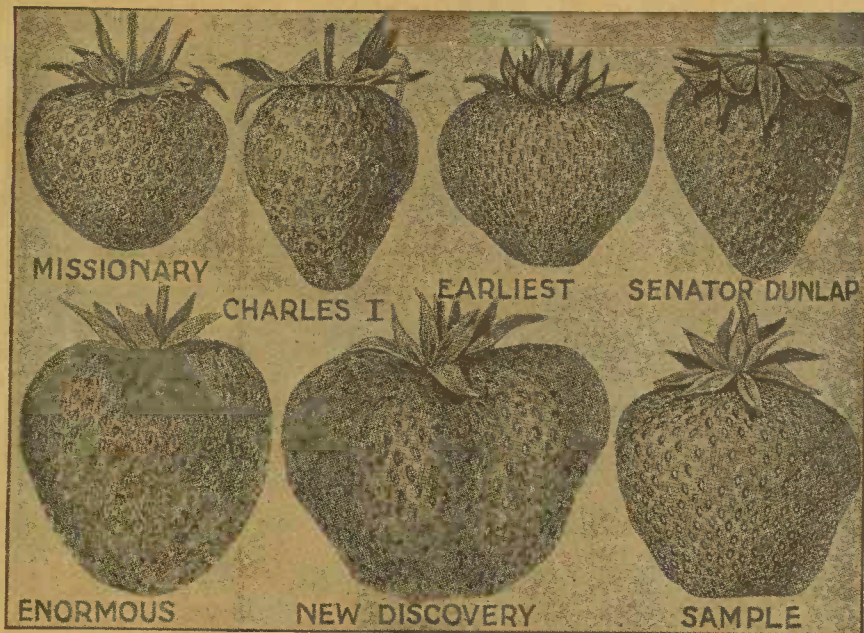

EXTRA EARLY VARIETIES

THE BEST AUTHORITY

We were the first to recognize the immense value of the Fall or Everbearing strawberry. "Fall Bearing Strawberry Secrets," a pamphlet written by us for Farm Journal of Philadelphia, in 1913, was the first and only authoritative treatise that has been written. Get a copy of this or a copy of "Farmer on the Strawberry" which contains the same material about the fall bearing strawberries; read what we have to say and you will at once see that our book is used as a text by all other authorities who attempt to write articles about these berries. "Farmer on the Strawberry" costs 25 cents. It is sent free with all orders from this Bargain List, amounting to \$5.00 or more.

CURRANTS

Fay's Prolific, 8c each; 25 for \$1.25; 100, \$4; 1000, \$35.

 White Smith, 20c each; 25 for \$3.50; 100, \$12.

L. J. FARMER ON THE STRAWBERRY

"We took up L. J. Farmer's little book of ninety-four pages on the strawberry with pleasant anticipations. 'The strawberry man,' of Pulaski, N. Y., needs no introduction to those who have been interested in small fruit culture. As a boy, nearly thirty years ago, he entered upon the business of raising small fruits with the enthusiasm of youth, which has not slackened in the years that have passed. As an inevitable result he knows a good deal about the strawberry, which is evidently his pet fruit, and, as he says, most of his knowledge he has gained by experience, 'much of which has been pretty costly.' So 'Farmer on the Strawberry' is worth reading by every one who is fond of the most delicious fruit that ever grew; worth studying and laying aside for future reference by all who have the good fortune to possess land, whether measured by acres or square rods. Instructions and full particulars are plainly given to the grower on a small tract for the family table or the larger producer who does business on a commercial scale. For the latter there is a valuable chapter on 'Practical Suggestions on Marketing Berries.'

"Mr. Farmer closes his volume with a chapter on fall bearing strawberries, the cultivation and improvement of which have interested him more than any other work he has ever engaged in. He is not the originator, he says, of any of these varieties, but he believes he is the first to demonstrate their great value from a commercial or practical standpoint. The twenty or more half-tone illustrations scattered through the volume are very attractive, and we know from personal examination of some sample

fruit last fall that they are more attractive in the basket than on the printed page. Doubtless there will always be a demand for fall strawberries; how extensive that demand may be remains to be shown. Mr. Farmer's account of their development makes interesting reading, and the reader may have the satisfaction of knowing that Mr. Farmer is not a romance writer."—From Editorial in the Tribune Farmer.

The price of our little book, 'Farmer on the Strawberry,' is 25 cents. We give it free with orders amounting to \$5.00 or more. Money back if you are not satisfied that it is worth more than the 25 cents to you.

WHAT—WHERE—WHEN AND HOW TO PLANT

A pamphlet of thirty-six pages, giving definite instructions how to select and plant all kinds of Fruit and Ornamental Trees, Berry Plants, Roses, Shrubs, Evergreens. Vines and Perennials. Facts on four questions that everyone wants to know. Profusely illustrated with common sense illustrations that everybody can understand. I consider this little pamphlet of the greatest value to anyone who contemplates planting fruits or ornamentals. It shows how to lay out school and home grounds and contains a wealth of information that everybody is anxiously seeking. Price, 25 cents each. Special prices on large quantities.

Celery Plants. Ready in June, July and August. 25c per dozen, 75c per 100, \$3.50 per 1000. **Varieties:** White Plume, Golden Self-Blanching, Dwarf Golden Heart, Giant Pascal.

Sweet Potato Plants. Ready in May, June and July. 50c per 100, \$3.50 per 1000. **Varieties:** Jersey Yellow, Vineland Bush, Jersey Red, Red Bermuda, Jersey Big Stem Improved.

Cauliflower Plants. 50c per 100, \$4 per 1000. **Variety:** Early Snowball.

Beet Plants. Crosby's, Eclipse, Egyptian, 25c per 100, \$2 per 1000, 5000 or over at \$1.50 per 1000.

Lettuce Plants. 30c per 100, \$2 per 1000. **Varieties:** Big Boston, Boston Market, Grand Rapids, All Seasons, New Morse.

Pepper Plants. 50c per 100, \$3.50 per 1000. Ready in May and June. **Varieties:** Bull Nose, Ruby King, Sweet Mountain, New Tomato, True Red Chili, Red Cayenne.

Brussels Sprouts. 50c per 100, \$3.50 per 1000.
Egg Plants. 60c per 100, \$5 per 1000. **Varieties:** New York Improved, Black Beauty.

Kale. Dwarf Green Curled Scotch, 30c per 100, \$2.50 per 1000.

Leek. Carenum and Rouen, 35c per 100, \$2.50 per 1000.

Kohl Rabi. Early White Vienna, 40c per 100, \$2.50 per 1000.

Parsley. Dwarf Fern Leaf, 35c per 100, \$3 per 1000.

SEED POTATOES

Home-Grown Seed

Early Michigan, pk., 75c; bu., \$2; 10 bu., \$17.50.

Early Rose, pk., 75c; bu., \$2; 10 bu., \$17.50.

Irish Cobbler, pk., 75c; bu., \$2; 10 bu., \$18.

Bull Moose, pk., 75c; bu., \$2; 10 bu., \$17.50.

Hastings, pk., 75c; bu., \$2; 10 bu., \$18.

Gold Coin, pk., 75c; bu., \$2.50; 10 bu., \$20.

Single tubers of any of the above varieties, 15c each postpaid; or one each of the five varieties for 50c not postpaid.

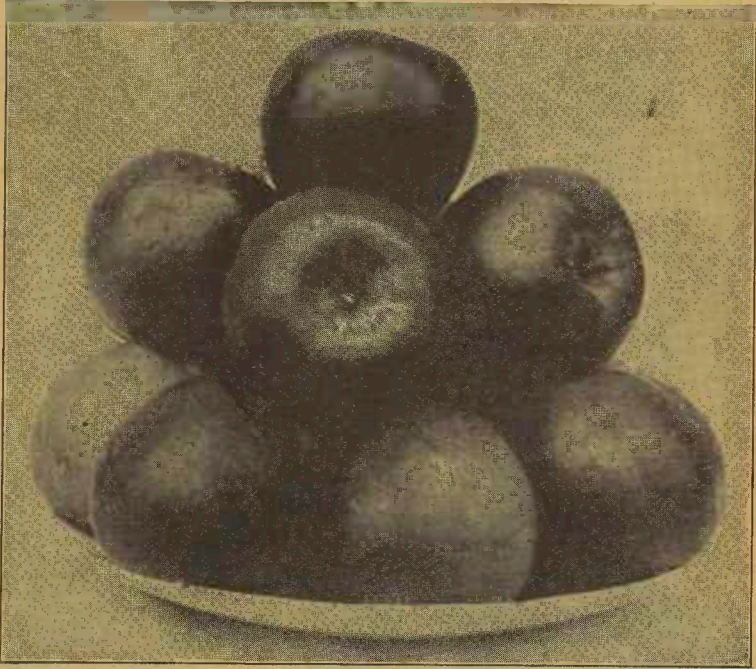

If you need a large quantity of potatoes for seed or eating potatoes (market varieties), correspond with us for prices.

FRUIT TREES

APPLES
THE OSWEGO
APPLE

This new apple was discovered by Daniel D. Tryon of a neighboring town, an old school-mate of mine, some ten years ago. The young tree was found growing up through the branches of an old Northern Spy tree that had become split down by its heavy loads of fruit. The bright red apples were in striking contrast to the streaked fruit on the Northern Spy branches and easily attracted the attention of Mr. Tryon. This new apple has all the valuable characteristics of the Northern Spy and in addition has a beautiful clear red color, the most beautiful apple I have ever seen. The trees are healthy, clean growers and can hardly be distinguished from the Spy. They are so near like it in growth. The original tree has borne a crop of fruit every year since it was discovered and therefore can be truthfully called an annual bearer.

The fruit of the Oswego apple averages about the same size as the Spy and has the same general characteristics, except color, which is a beautiful deep clear red, with no stripes or splashes. Near the calyx end are small dots like those in the Spitzenburgh, and this characteristic, combined with the excellent quality, has led the originator to believe it a cross between the Spy and Spitzenburgh. The flesh is very fine grained, yellowish white, of a rich appearance and has a flavor suggesting a cross between the Spy and Spitzenburgh. It has a crispy Spy taste, although not so juicy as the Spy. The season is about the same as Spy, but they are longer keepers. The fruit is of exceptionally fine appearance, and when placed on exhibition with other varieties attracts the greatest attention. We have shown them at meetings of the Western New York Horticultural Society and of the New York State Fruit Growers Association, and everybody is enthusiastic for their future. We offer a fine lot of two and three-year-old trees for sale this spring at the following prices. Some of the smaller trees can be cut back so as to go by parcel post. 5 to 6 feet, \$1 each; \$7.50 per dozen; \$50 per 100.

A Plate of the New Oswego Apple

STANDARD VARIETIES OF APPLE TREES

Summer Apples. Early Harvest, Golden Sweet, Red Astrachan, Sweet Bough, Yellow Transparent.
Autumn Apples: Alexander, Duchesse of Oldenburgh, Fameuse (Snow Apple), Gravenstein, Maiden's Blush, Wealthy, Pumpkin Sweet.

Flemish Beauty Pear

ORNAMENTAL SHADE TREES EVERGREENS AND FOREST TREE SEEDLINGS

The demand for all kinds of ornamental trees is constantly increasing and every place needs to have a certain number of trees of some kind planted around it to make it look home-like. The ones offered are standard varieties.

Birch (Cut Leaf Weeping). (Betula Alba var. Pendula Lacinata.) Tall, slender, drooping branches and delicately cut leaves. White trunks and branches attractive in winter. 5-6 ft., 75c each.

Catalpa Bungii. A unique ornamental tree with dome-shaped head. Hardy. 5-7 ft., 1 year heads, 75c each.

Maple, Norway (Acer Platanoides). One of the best and most beautiful trees for lawn, street or park planting. 6-8 ft., 65c each; 8-10 ft., \$1.00 each.

Maple, Purple Leaf (Acer Platanoides var. Schwedleri). Similar to the Norway Maple, except in early spring the young leaves are red, changing to purplish green. 6-8 ft., \$1.00 each; 8-10 ft., \$1.50 each.

Poplar, Lombardy (Populus Italica). Tall, narrow tree with striking and picturesque appearance. Conspicuous landmarks. 6-8 ft., 50c each.

Red Bud (Cercis Occidentalis). Attractive, especially when covered with the pink blossoms, before the leaves appear. 3-4 ft., 15c each.

Larch, European (Larix Decidua). Beautiful in spring when covered with new growth of soft, feathery, light green foliage. Attractive. 5-7 ft., 45c each.

Pine, Dwarf Mugho (Pinus Montana, var. Mughus). Tree is broader than it is high. Effective for rocky places or groups of evergreens. 12-18 in., 65c each.

Pine, Austrian (Pinus Austrica). Vigorous growing, tall, massive tree, with spreading branches. 2-3 ft., 60c each.

Spruce, Koster's Blue (Picea Excelsa, var. Kosteriana). Best of the Blue Spruce, perfectly hardy. Very attractive on account of its silvery blue foliage. 2-3 ft., \$1.75 each.

Spruce, Norway (Picea Excelso). Most common of all the Spruces. Good for hedges, screens, backgrounds or specimen planting. 18-24 in., 35c each.

FOREST TREE SEEDLINGS

Catalpa Speciosa. 12-18 in., \$1.75 per 100; \$9.25 per 1,000.

Catalpa Speciosa. 10-12 in., \$1.00 per 100; \$6.75 per 1,000.

Black Walnut. 1-2 ft., \$3.00 per 100; \$20.00 per 1,000.

Mulberry. 1-2 ft., \$1.50 per 100; \$12.00 per 1,000.

White Birch. 2-3 ft., \$3.00 per 100; \$20.00 per 1,000.

Locust. 12-18 in., \$1.00 per 100; \$9.00 per 1,000.

Black Locust. 10-12 in., 90c per 100; \$8.00 per 1,000.

AMERICAN MULBERRY

This Mulberry is equal to the Downing in all respects and is a much hardier tree. It is a vigorous grower and very productive. The variety for the fruit. The berries are very large and black. Ripens from the middle of June to the middle of September. Excellent for wind-breaks and around the orchards. 4-6 feet, first-class, 25c each.

Large Bush Lilac at one end of our residence, planted by my mother years ago

HARDY ORNAMENTAL SHRUBS

Two-year-old plants, 17c each; \$15 per 100 for medium sizes shrubs, mailing size

Large size, 35c each; \$25 per 100

Hydrangea Paniculata Grandiflora. Handsome shrub; blooms late in summer.

Olive, Russian Wild. Beautiful silvery foliage. Hardy.

Calycanthus. Old fashioned shrub.

Forsythia. Yellow blossoms appear in early spring.

Berberry, Purple. Foliage purple, attractive.

Berberry, Green Leaf. Hardy ornamental shrub, with bright scarlet fruits in fall and winter.

Berberry, Japanese. Valuable along drives or for massing. Red berries in fall.
Lilac. An old time favorite.
Snowball. Large white flowers in spring.
Snowberry. Good for massing. Snow white berries appear late in the season.
Coral Berry. Compact bush, with dark red fruits remaining on until late in the winter.
Spirea Van Houttei. Beautiful, curving branches covered with snow-white blossoms in May.
Spirea Billardii. Flowers are bright pink in July and August.
Spirea Thunbergii. Graceful shrub. White flowers appear in April and May.
Rose of Sharon. Free flowering, hardy shrub, many shades of color.

ADDITIONAL DECIDUOUS SHRUBS

Almond. Double pink, red and white. 2 to 3 ft., 25c each.
Berberry, Common. 2 to 3 ft., 25c; Purple, 2 to 3 ft., 25c; Thunbergii, 18 to 24 in., 25c each.
Calycanthus Florida. 2 to 3 ft., 25c each.
Caragana Arborescens. 2 to 3 ft., 25c each.
Caryopteris Mastacanthus. 18 to 24 in., 25c.
Clethra Alnifolia. 2 to 3 ft., 25c.
Cornus Elegantissima Variegata. 2 to 3 ft., 36c.; Mascula, 2 to 3 ft., 25c; Spaethii Aurea, 2 to 3 ft., 30c.

Rhus Glabra Laciniata. 2 to 3 ft., 30c; Typhina, 2 to 3 ft., 25c.
Ribes Aureum. 3 to 4 ft., 25c.
Sambucus Aurea (Golden Elder). 2 to 3 ft., 25c.
Spirea Van Houtte. 2 to 3 ft., 25c; Thunbergii, 2 to 3 ft., 25c; Reevesii, 2 to 3 ft., 25c; Prunifolia, 2 to 3 ft., 25c; Callosa Rosea, 2 to 3 ft., 25c; Callosa Alba, 2 ft., 25c; Bamulda, 2 to 3 ft., 25c; Billardi, 2 to 3 ft., 25c; Aurea, 3 to 4 ft., 25c; Arguta, 2 to 3 ft., 25c; Anthony Waterer, 2 to 3 ft., 30c.
Symphoricarpos Racemosus (Snowberry). 2 to 3 ft., 25c; Vulgaris (Red Fruited Indian Currant), 2 to 3 ft., 25c.
Tamarix Gallica. 2 to 3 ft., 25c.
Viburnum Lantana. 2 to 3 ft., 25c; Opulus (High or Bush Cranberry), 2 to 3 ft., 25c; Opulus Sterilis (Common Snowball), 2 to 3 ft., 25c; Plicatum, 2 to 3 ft., 30c; Tomentosum, 2 to 3 ft., 25c.
Weigela Abel Carriere, 2 to 3 ft., 25c; Candida, 2 to 3 ft., 25c; Desboisii, 2 to 3 ft., 25c; Eva Rathke, 2 to 3 ft., 30c; Floribunda, 2 to 3 ft., 25c; Rosea, 2 to 3 ft., 25c; Variegata, 2 to 3 ft., 25c.

TREE LILACS

This assortment of varieties represents all shades of color, single and double, and includes the cream of the Lemoine Hybrids. It was selected from the best in the Highland Park collection at Rochester, N. Y. Prices,

A Good Specimen of Clematis Paniculata, Owned by Our Neighbors, Mr. and Mrs. George Hutchings.
 Price of These Plants, 25 Cents Each.

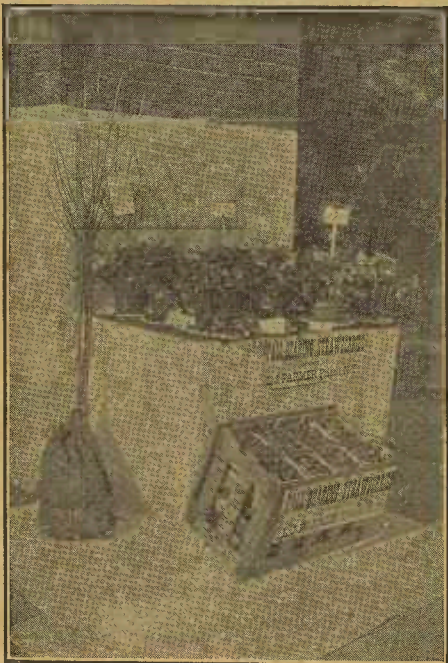

Deutzia Crenata. 2 to 3 ft., 25c; Crenata Flora Pleno Alba, 2 to 3 ft., 25c; Crenata "Pride of Rochester," 2 to 3 ft., 25c; Crenata Rosea Flora Pleno, 2 to 3 ft., 25c; Gracilis, 18 to 24 in., 25c.

Hydrangea Paniculata Grandiflora. Tree form, about 3 ft., 30c; Bush Form, 3 to 4 ft., 30c; 2 to 3 ft., 25c.
Hydrangea Arborescens Sterilis (Grandiflora Alba). 2 to 3 ft., 30c; 18 to 24 in., 25c.
Japan Quince. 2 to 3 ft., 25c.
Kerria, Japonica Single. 2 to 3 ft., 25c.
Mahonia Aquifolia. 18 to 24 in., 30c.
Philadelphus Aurea (Golden Syringia). 18 to 24 in., 25c; Avalanche, 18 to 24 in., 25c; Coronarius (Garland Syringa), 2 to 3 ft., 25c; Coronarius Flore Pleno (Double Flowered), 2 to 3 ft., 25c; Grandiflorus, 2 to 3 ft., 25c; Lemoinei, 2 to 3 ft., 25c; Speciosa, 2 to 3 ft., 25c.
Privet Amur River (Hardy). 2 to 3 ft., 15c; \$10 per 100; Variegated, 12 to 18 in., 20c; \$10 per 100.
California Privet. 3 to 4 ft., 15c; \$6 per 100; 2 to 3 ft., 10c; \$4.50 per 100; 12 to 18 in., 8c; \$3 per 100.
Prunus Pissardi. 2 to 3 ft., 25c; Triloba, 2 to 3 ft., 25c.

Tree Form, 3 to 4 ft., 35c each; **Bush Form,** 2 to 3 ft., 30c each; 18 to 24 in., 25c each.
Aline Mocquery. Single, Dwarf, compact growth, flowers dark purplish red; a profuse blooming sort and one of the finest of lilacs.
Alphonse Lavallee. Double. Blue, shading to violet; extra large panicles.
Amelle Dupret. Double. Very double, lilac-colored flowers borne in short heavy panicles.
Bousingault. Double. A new light blue lilac.
Charles Joly. Double. Dark reddish purple.
Charles X. Single. The well known favorite, purplish red variety; strong, rapid grower; trusses loose and graceful.
Colmarensis. Single. Very large, pale blue flowers, and fine glossy foliage.
Congo. Single. Flowers large; wine red; very double and compact.
Crampel. Single. Enormous bluish-lilac flowers with white center.
Dr. Breitschneider. Double. Purplish in bud, opening white; late; very much on the order of Villosa.
Dr. Masters. Double. Spikes a foot long; flowers very light; clear lilac, with lighter center.
Dr. Troyanewsky. Double. Enormous. Panicles broad rather than long, mauve.
Edouard Andre. Double. Very clear rose-colored flowers.
Frau Dammann. Single. The truss is immense, the flowers of medium size and pure white.
Japonica. Single. Creamy white, in large panicles; a month later than other lilacs; grows into a small tree.

- Lamarch.** Double. Very large panicles; flowers large; very double; rosy-lilac.
- Lilarosa.** Single. Silvery pink; very desirable.
- Leon Simon.** Double. Compact panicles of bluish-crimson flowers.
- Louis Van Houtte.** Single. Dark red flowers in large panicles.
- Marc Michaeli.** Double. Very large spikes of enormous double flowers; clear lilac blue; nearly white underneath.
- Mathieu de Bombasie.** Double. Medium sized panicles; flowers small and very double; reddish mauve in color; very free flowering.
- Marie Legraye.** Single. The panicles of pure white single flowers and very fine and fragrant; an excellent forcing variety.
- Madame Abel Chatenay.** Double. Pure white, large panicles.
- Madame Lemoine.** Double. Pure white; fine.
- Michael Buechner.** Double. Dwarf; very double; pale lilac.
- Othello.** Single. Dark, purplish red; large graceful panicles of single flowers; a good one.
- Philemon.** Single. Showing possibly the darkest shade found in lilacs, and one of the very best.
- President Loubet.** Double. One of the darkest lilacs; long compact spikes of enormous flowers, reddish carmine in bud, and opening purplish-red.
- President Viger.** Double. Bluish-lilac; an extra fine variety.
- Princess Alexandra.** Single. One of the finest white varieties; large panicles.
- Senateur Volland.** Double. Flowers of rosy-red color.
- Souvenir de Ludwig Spaeth.** Single. Panicles long; individual flowers; large, single, dark purplish-red; a well known and favorite variety.
- Toussaint L'Ouverture.** Single. Very dark, purplish flowers, single and oddly crinkled petals.
- Vivand-Morel.** Single. Very long spikes; flowers of medium size, round and double; light bluish lilac, with white center.
- Villosa.** Single. Large panicles; flowers light purple in bud; opening white; late.
- William Robinson.** Single. Violet-mauve, clear underneath; irregular flowers in long spikes.

ORNAMENTAL VINES

- Good strong, two-year-old, field grown plants.
- Clematis Paniculata.** Hardy, abundant small white flowers in late summer. 15c to 25c each.
- Clematis.** Large flowering; robust growing vines, with showy blossoms (Jackmanni, Henryii, Mad. Ed. Andre). 35c each.

Our Exhibit of Oswego Apples and Fall-bearing Strawberries at Oswego, N. Y., County Fruit Show.

ADDITIONAL CLIMBING VINES

- Actinidia Arguta.** 18 to 24 in., 25c.
- Ampelopsis Engelmanni.** 2 years, 25c. Quinquifolia, 2 years, 25c. Veitchii, 2 years, 25c.
- Aristolochia Siphon (Dutch Pipe).** 2 to 3 ft., 30c each.
- Celastrus Scandens.** 3 to 4 ft., 25c.
- Honeysuckle (Kall's Japan).** 25c each; Scarlet Trumpet, 25c each.
- Wistaria.** Chinese Purple, 30c; Chinese White, 35c.
- Ampelopsis Veitchii (Boston Ivy).** Standard vine for cities and for stone and brick walls. 17c to 25c each.
- Ampelopsis Englemanni.** Good vine for covering walls, clings firmly. 15c to 25c each.
- Honeysuckle, Evergreen.** Very hardy, blossoms white, changing to yellow. Very fragrant. 15c to 25c each.
- Akebion Quinata.** Hardy, ornamental, produces dense shade. Not attacked by insects. 25c each.
- Kudzu Vine.** A rapid growing vine. 10c to 20c.
- Wistaria.** One of the commonest vines. Blooms in May and sometimes in August or September. 20c to 35c each.
- Madeira Vines.** Rapid growing with dense foliage. Excellent for summer screens. Profusion of fragrant flowers late in summer. 10c to 20c each.

M. P. Wilder Rose

ROSE BUSHES FOR OUTDOOR PLANTING

PEONIES

We offer here an assortment covering the entire range of colors, extending over the blossoming season, and representing the very best out of hundreds of varieties gotten together from specialists in France, England, Holland, Japan and this country. Strong divisions with 3 to 5 good eyes.

Special. We have nearly 1,000 peonies of mixed varieties, all colors, that have been grown one year from divisions, that we offer at 20 cents each, \$2.00 per dozen, while they last. We cannot guarantee color, but we can guarantee that you will be pleased if you plant them.

LIST OF NAMED VARIETIES

- Camille Calcot.** Light rose, 25c each.
Carnea Striata. Pale flesh, shading to almost pure white, 25c.
Charlemagne. Creamy white, center light lilac, flesh shaded with chamois, late, 35c.
Clarissa. Rosy pink, inner petals, sulphur, 20c.
Comte de Diesbach. Dark red, early, 25c.
Comte de Jussier. Outer petals pink, inner yellowish, 25c.

Lilac Bush

- Comte de Nanteuil.** Very large and full, dark rose, 25c.
Comte de Niepperg. Dark rose pink, large bloom, 25c.
Comte de Osmond. White with sulphurish center, 30c.
Couronne de Or. Immense, very full, imbricated, ball shaped bloom; snowy white with yellow stamens; fragrant, perfect as a cut flower sort; very late, coming in after all other stemmed white sorts are gone, 30c.
Delachel. Deep crimson purple; one of the best dark peonies; late midseason, 25c.
Dortens Ceros. Bright pink, 20c.
Duchesse de Nemours. The Calor variety; cup shaped, sulphur white; late and one of the best whites, 35c.
Duke of Wellington. Flowers fragrant, sulphur white, large and well formed; strong grower; stems long and firm; late midseason, 35c.
Eduis Superba. Soft pink, very early, 25c.
Felix Crousse. Brilliant, flaming red; far and away the best red; the popular color with florists; late midseason, 40c.
Festiva Alba. Ivory white, with occasional crimson spots in center petals; ships well and stands cold storage admirably; midseason, 30c.
Festiva Maxima. The ideal early white for floral work; a well nigh perfect peony, 30c.
Floral Treasure. Rich, soft pink, 30c.
Francois Ortegat. Semi-double; large, purplish crimson bloom, with brilliant yellow golden anthers; very striking, 25c.
Fulgida. Purplish red, 25c.
General Cavallnac. Lively lilac pink, shaded clearer pink, 20c.
Glorie de Douai. Purplish scarlet crimson, with black reflex, late, 25c.

Golden Harvest. Very large blooms, blush guard petals; creamy white center; midseason; one of the freest bloomers, 30c.

Grandiflora Carnea Plena. Very early; clear flesh pink, shaded lilac; keeps well; ships well; desirable for cutting or landscape work, 25c.

Grandiflora Rosae. Light rose, outer petals very large, inner smaller and bunched; vigorous grower, 25c.

Lady Bramwell. Silvery pink, midseason, 25c.

Laius. Outer petals white, inner sulphur, changing to white; medium size, 30c.

La Sublime. Crimson; fine, full, fragrant, 25c.

La Tulippe. Late, very large, full, shell formed blooms, borne on long, erect stems; delicate rose, fading to creamy white; one of the best, 35c.

Livingstone. True Crousse variety, soft rosy pink, silvery reflex, strong, long stems; best late pink, 60c.

Louis Van Houtte (Delache). Fine dark crimson, very double, strong, 30c.

M'lie Marie Calot. Clear satin-like silvery reflex, 30c.

M'lie Rene Dessert. In clusters, soft lilac, with silvery violet reflex, 35c.

Madame Crousse. One of the best whites; midseason, 35c.

Madame Lebon. Bright cherry pink, 25c.

Madame Rose Rendatier. Delicate rose, 25c.

Meissonier. Reddish purple, crimson center, 60c.

Monsieur Barral. Soft, clear pink; large and full; long stems, 25c.

Monsieur Dupont. Very large, ivory white, with carmine border in center petals; attractive, late midseason, 35c.

Nigricans. Very late, brilliant, purplish-crimson, 35c.

Nobilissima. Bright, deep pink; good stems; last wonderfully, 35c.

Officinalis Mutabilis Alba. Earliest white, 35c.

Officinalis Rosae. Semi-double rose, the best to bloom, 30c.

Officinalis Rubra Pleno. The well known, very early, double crimson, 25c.

Palmata. Cut leaved, single scarlet; earliest, 40c.

Papaviflora. Guard petals pure white; others yellowish; excellent, 30c.

Phryne. Blush white, 25c.

Prince Imperial. Brilliant, purplish scarlet; free bloomer, fine for massing in landscape work, 25c.

Prolifera Tricolor. Soft flesh, with center of golden yellow, 25c.

Queen Victoria (Whitleyil). There are two well-known varieties of this name; this is the standard pure white market variety for storage, 25c.

Richardson's Dorchester. Salmon pink, one of the very best late ones, 40c.

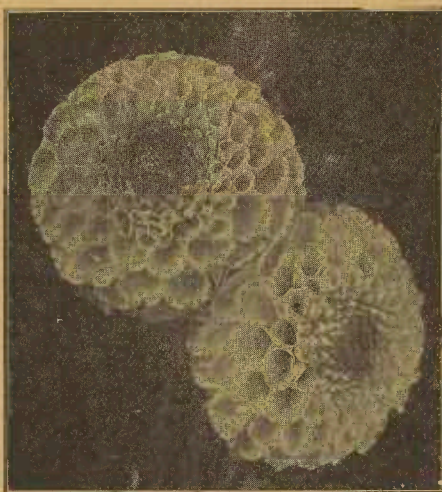

Richardson's Grandiflora. Flesh pink, with lighter shades in center; fragrant; one of the largest peonies known; latest pink in bloom, 40c.

Rosea Superba. Brilliant, deep cerise, pink, blooms compact and perfectly formed; healthy growth, long stems; keeps well; late midseason, 40c.

Rosea Plena Superba. Very full flower, delicate pink and salmon, 25c.

Triumph Du Nord. Rose, shaded crimson, 25c.

Tree Peonies. Forty named varieties, different colors, 60c each.

BACTERIA FOR INOCULATION

Standard Nitrogen-gathering Bacteria, 50 cents per acre. Put up in bottles and guaranteed to inoculate leguminous seeds for which it is prepared.

IMPORTANT.—Prices given for Clover, Grass and Field Seeds are approximately correct but subject to market changes at any time. If you send us too much money for any of above seeds, we will either refund the excess amount or put in more seed. If price has advanced on any seed, we will put in less seed. In any case, you will get your money's worth.

FARMER'S POULTRY DEPARTMENT

Pulaski is the center of a great poultry industry. We keep the White Wyandottes and Muscovy Ducks on our own farms and the rest of our eggs are produced by specialists in this locality. We believe that our plan insures more fertile and true to name eggs than when several varieties are kept on the same place, which necessitates their being penned up. Then, too, it is almost impossible to prevent them getting together once in a while, where several varieties are kept near each other. Eggs are packed in baskets with dry shavings and delivered to express at prices attached. We do not like to ship eggs by parcel post. The express companies have made a general reduction on rates of from 20 to 50%, and we recommend shipping only by express. After years of experience, we have chosen half bushel and peck Diamond market baskets as the best package to ship eggs for hatching. We exercise the greatest care to have all eggs pure and reliable, but we cannot become responsible for the faults of others. If eggs are broken in transit or do not hatch a reasonable amount, we will refill the order at one-half price. Our egg business is handled as properly as we believe it possible, and yet, sometimes, they go wrong. Beware of the dealer who says he never has a dissatisfied customer or who will guarantee you a perfect hatch. We will supply fowls at \$2.50 per bird, \$6.00 per trio, except of the more expensive breeds, on which we will give special quotations by mail. Correspond with us if in need of a large number of eggs or fowls or of the more rare varieties.

DAY-OLD BABY CHICKS

THE SECRET OF CHICKS WITH "VITALITY"

Comparison of prices should not be the deciding factor in placing your order for chicks. Weak, sickly, poorly hatched chicks are dear at any price. Why buy such when you can get **VITALITY** as well as **QUALITY** at a reasonable price? **ONE HUNDRED** of this kind are worth **ONE THOUSAND** poorly hatched mongrels.

HOW TO ORDER CHICKS

Orders for chicks should be sent in as far in advance as possible. When received, orders are booked in rotation and filled in that order, as near to the date requested as possible.

Be sure and give full name of your express office as well as your Post Office address. (Write full name plainly.) State plainly the number and variety of chicks you want, when wanted, and we will acknowledge receipt of your order at once and tell you about when the chicks will be shipped.

If you wish to book your order early and it is not convenient for you to pay for them at the time, send one-quarter or twenty-five per cent. of the full amount of the order and the balance a few days before the shipment is to be made.

The above also applies to orders for eggs for hatching.

S. C. White Leghorns

OUR GUARANTEE TO YOU

We guarantee to deliver chicks or eggs to you in first-class condition. On arrival, open box, in presence of expressman; if any chicks are dead or eggs broken, have express agent or postman mark number on the back of the receipt and return the receipt to us and we will refund your money for them, or replace them free of charge. In this way, you have no loss and get full number you pay for.

We have successfully shipped baby chicks and eggs for hatching 1,500 miles and can guarantee safe arrival.

A **YELLOW LABEL** will be found pasted on the box containing **LIVE BABY CHICKS**, which reads as follows:

LIVE CHICKS

EXPRESSMAN:—Please be **SURE** and keep this box of **CHICKS LEVEL, DRY, out of the SUN and away from FIRE or HEAT**, as there is **DANGER of KILLING** them.

ABOUT ORDERING

We are usually in a position to ship eggs for hatching and Day Old Chicks within a week from the date your order is received; we, however, advise you to allow us to book your order early, thereby avoiding all delays and the many disappointments that are bound to occur in the busiest part of the season.

CRATES AND BASKETS

Our crates and baskets are the best that are made. They are standard size and no one need fear using them on account of the law. We have discontinued using and selling cheap made baskets. It does not pay anybody in the end. These goods are made by the most reliable manufacturers in the country.

AGENTS FOR BERRY PLANTS

We employ no salaried agents to sell Berry Plants or other goods for us, and if any person represents himself as such you must have nothing to do with him, if he is a stranger or an unreliable person. We have no objection to people taking orders for us, but they must do it on their own responsibility. To reliable parties who will go among their friends and neighbors to solicit orders for plants, we will give our best and lowest rates for large quantity shipments. We do not and cannot, however, allow a certain commission below catalogue rates. Our prices are too low to admit of this. If you order goods from us at lowest 1,000 rates and sell out to your customers at dozen and hundred rates, it makes a pretty fair commission. It is sometimes possible when we have a surplus, to quote even lower prices than are listed here, on large orders. Better write us.

A SURPLUS OF CATALOGUES

If you have not already received my regular 1916 catalogue (issued in January), you better send and get a copy. This year we printed one hundred and ten thousand and we have more than regular calls will take up, so we are willing and anxious to send one to anybody interested in berries. It does not make any difference whether you intend to order plants of me this year or not, you can have a catalogue if you want it by addressing

L. J. FARMER,
Pulaski, N. Y.

LOWER IN COST THAN EARTHEN POTS AND UNBREAKABLE

For over twenty years florists, nurserymen and market gardeners have used the **NEPONSET** Flower Pot with entire satisfaction. The pot eliminates the troubles and loss caused to shippers of plants and nursery stock in clay pots.

The savings to shippers are three-fold—

First—The pots are much cheaper, and owing to their light weight greatly reduce expressage.

Second—There is no loss from broken pots.

Third—The waterproof nature of the **NEPONSET** Pot prevents rapid drying of earth as in the old style clay pot—an important point with shippers. They hold the earth and roots firmly, require little time to prepare for shipment, allow ample drainage and air.

NEPONSET Waterproof Paper Flower Pots are made from a tough, lasting and thoroughly waterproof paper which will stand exposure to the weather for a long time. The pots may be used over and over again for transplanting and similar uses. In fact the pots can be used in every way that earthenware pots are used.

For transplanting and shipping potted plants, and for rooting or shipping strawberry, tomato and cabbage plants, **NEPONSET** Waterproof Paper Pots are almost ideal.

You will never know until you have tried them, what convenience and economy these pots give for all flower pot uses.

Send for a sample and try it in your own work.

Weights and Sizes

NEPONSET Pots nest closely for shipment, and one thousand three-inch only weigh as much as one hundred and ten clay pots. The freight is, therefore, a very small item. **NEPONSET** Pots, packed for shipment in cases, weigh:

1,000 2¼-inch pots,	21 pounds
1,000 2½-inch pots,	25 pounds
1,000 3-inch pots,	30 pounds
1,000 3½-inch pots,	48 pounds
500 4-inch pots,	28 pounds
500 5-inch pots,	48 pounds
500 6-inch pots,	75 pounds

These pots are nested and packed in crates of 1,000 each, except 4, 5 and 6-inch sizes, which are put up in crates of 500 each.

2¼-inch pots per 1,000.....	\$ 2.42
2½-inch pots per 1,000.....	2.78
3-inch pots per 1,000.....	3.82
3½-inch pots per 1,000.....	5.24
4-inch pots per 1,000.....	6.60
5-inch pots per 1,000.....	10.96
6-inch pots per 1,000.....	14.68

For over twenty years this Weeder has been sold and no garden is completely equipped without one.

Price 25c each. Postage 4c extra.

THE PLUM FARMER BLACK RASPBERRY

This is the greatest blackcap raspberry that has ever been introduced. It was found by us in a batch of plants received from Ohio some fifteen years ago. We have propagated and sold it ever since and have yet to meet the man who thinks there is anything near as good in the blackcap line. It is grown and appreciated from Maine to California and everywhere receives the greatest praise. In 1909, a grower who lives about ten miles from us shipped ninety crates to New York City, which sold for over \$600. It is being planted for evaporating and fresh use to the exclusion of all others. The plants are very healthy, have a silvery bluish appearance when ripened in the fall and succeed where others fail. The fruit is grayish black, very firm, attractive, of the very highest flavor and is adapted for evaporating, as well as for fresh market or home use. I know of no fruit which pays growers in this locality as well. Buyers stand ready to pay the farmers 12 cents at their doors and the fresh fruit often retails in the cities for 25 cents per quart. We handled nearly 500,000 of these plants during the season of 1915. Now is the time to plant the Plum Farmer. Price, for extra large plants, 50c for 25; \$2 per 100; \$15 per 1,000; tip plants, 50c for 25; \$1.50 per 100; \$10 per 1,000; \$25 per 3,000.

Geneva, Ohio, October 20th, 1908.

I write to report to you on my first crop of Plum Farmer raspberries of which I purchased 1,000 plants over one year ago. The crop was one of the best I ever raised. They are fairly superior to any black cap I have ever seen. They resemble the Kansas but are a much harder, larger and more vigorous grower and stood the drouth better than any other variety. My crop was a model one, the berries larger than the Cumberland and will yield one-half more on the same ground, and bring a cent or two more in our local market. I hereby cheerfully recommend to all berry growers that they will make no mistake in raising this berry. It is the best all-around raspberry I have ever seen.

H. J. Richmond.

Penn Yan, Yates Co., N. Y., December 1st, 1908.

The Plum Farmer berry is ahead of our standard evaporating berry, the Ohio. I picked my berries with harvester this year during a rainy week, picking them when too wet to work in hay field. Sometimes the berries were so wet that we wet our sleeves through in batting them, yet they held their shape well and did not mat in drying as the Kansas will do. They are larger than the Ohio, produce more, better in quality, of a better color and hold their shape nearly as well. Two evaporator men came to see my dried berries. They said they never saw such large berries hold their shape so well, and not mat together. Both of these men raise the Ohio, which has been the standard for evaporating for years.

H. E. Matthews.

Sparta, Monroe Co., Wis., November 18th, 1908.

I have been growing the Plum Farmer for the past three years and it is the most profitable black raspberry we have ever tried, and we have grown about everything that has been offered to the public. Our Plum Farmer averaged us \$2.00 per 24-pint case, the past season, for the entire crop. It is the only black raspberry we shall plant in the future and the only one we are recommending others to plant.

W. H. Hanchett.

TOWNSEND GRAPE

This new grape originated in Western New York and has been thoroughly tested. I have eaten the fruit and it is fine. The vine is a strong, healthy, vigorous grower, producing an enormous crop of fruit. The bunches are medium to large in size, shouldered. The berries are medium sized. The flavor is sweet, agreeable and attractive. It ripens soon after Green Mountain, before Diamond, and is one of the most desirable grapes we know of for the northern states. We control the entire stock of this variety and have made the price very reasonable.

Prices of 1 yr. old vines, 25c each; 25 for \$3; 100, \$10; 2 yr. old, 30c each; 25 for \$3.50; 100, \$12.

THE IDAHO EVERBEARING RASPBERRY

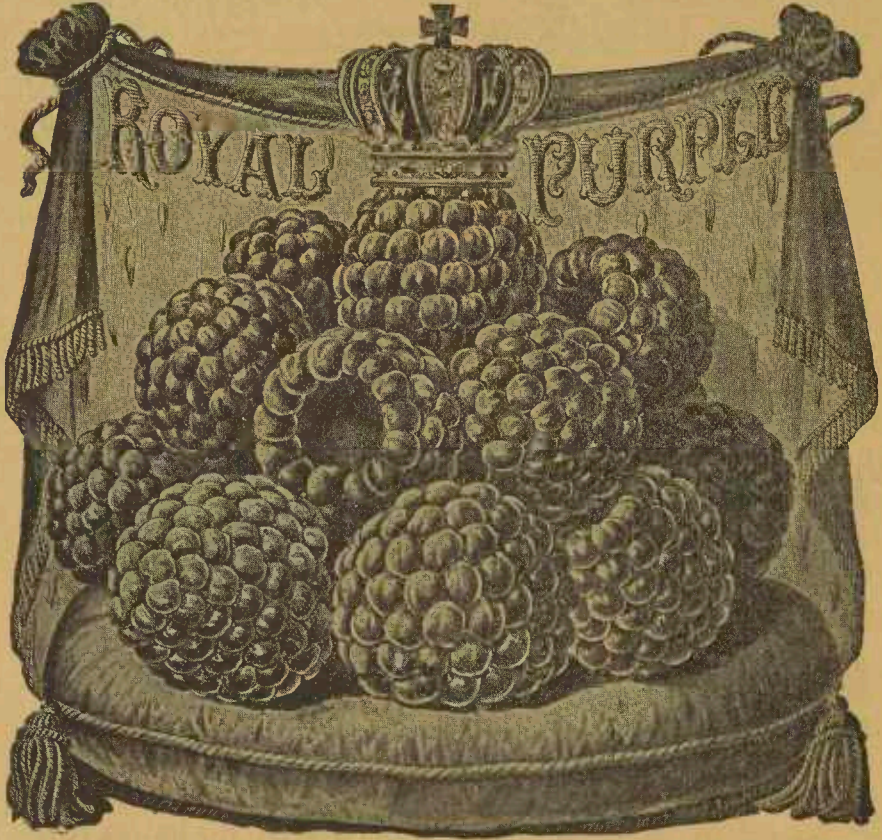

This new red raspberry was found growing in the State of Idaho. The plants are strong growers and, if given a fair chance, soon assert themselves. They are not such rampant growers as Cuthbert, and do not ever encumber the ground with useless plants, but they are sturdy growers and are not easily choked out by weeds or other varieties. The plants are the hardiest of all red raspberries, have withstood thirty degrees below zero and I believe they will easily stand forty degrees below zero. They rarely ever get over 3½ feet high and never have required trimming with us. They branch naturally like a tree and require very little attention, except to be kept clean of weeds and grass.

The fruit is very large, some berries attaining over one inch in diameter, of a deep red color and very attractive. It is very fine flavored. The season is early to late, ripening over the longest season of any red raspberry we have, beginning with Marlboro and lasting long after Loudon and Cuthbert are done. I am able to sell the fruit for the best price of any raspberry we grow. We are planting it extensively for fruit and as soon as its merits are well known, the demand for plants will be enormous. We have fruited it now for six years and consider it the most valuable of all red raspberries for very cold climates. Cuthbert is the only one that anywhere near equals it. It will grow and produce an enormous crop where Cuthberts will freeze out entirely. Retail price, 10c each; 6 for 50c; dozen, 75c; 25 for \$1.00; \$3.00 per 100; \$20.00 per 1,000; 3,000 for \$50.

FALL BEARING STRAWBERRY PLANTS, FRUITING IN POTS

We will supply large plants of the Fall Bearing Strawberries in 6-inch pots with blossoms, green and ripe berries on them, during September, October and November, as late as Thanksgiving, for \$1.00 per plant, pot and all. Packing, 25c extra. These strawberry plants in full fruit, are unsurpassed for table decoration.

below zero without injury. It will go through the winter uninjured when Schaffner and Columbian freeze back to the ground. The fruit is same size as Columbian with us and is so firm and dry that it can be picked and shipped long distances in quart boxes. We own and control the entire stock of Royal Purples with the exception of a very few plants sold at retail the past few seasons. Price, one-year transplants, 15c each; \$1 per dozen; \$3.50 per 100; \$30.00 per 1,000; tips, 12½c each; 6 for 50c; dozen, 75c; 100 for \$2.50; 1,000 for \$20.00; 3,000 for \$50.00.

THE ROYAL PURPLE RASPBERRY

Purple raspberries are more vigorous and productive than either reds or blacks and will succeed in unfavorable locations when reds and blacks fail. For this reason they are recommended for the average planter. There is usually more money in growing Columbians and Schaffers at 10c to 12c per quart than Cuthberts at 15c. The Royal Purple is the greatest advance yet made in purple raspberries. What I think of the Royal Purple is best expressed by the fact that I pay \$1,000 to control the sale of the plants. The Royal Purple is dry, hard and firm, does not crumble and can be picked before fully ripened, as it comes off the stem easily. Being easy to pick, the tendency is to gather them before fully ripe and they do not have that sickly dull ashen color that purple raspberries usually have. It was no trouble for us to get 15c per quart for our crop of Royal Purples this year. One great point in favor of the Royal Purple is its lateness. The Columbians were in their prime July 23rd last year, while the Royal Purples did not get at their best until over a week later and were still making good pickings August 20th on last year's growth. The plants are strong, sturdy growers, nearly thornless, and when the canes are ripened in the fall and winter are of a beautiful dark red color. The original bush has stood in a stiff blue grass sod and borne fruit for fourteen successive seasons without fail. It is the hardest purple raspberry the writer has ever seen, having withstood thirty-five

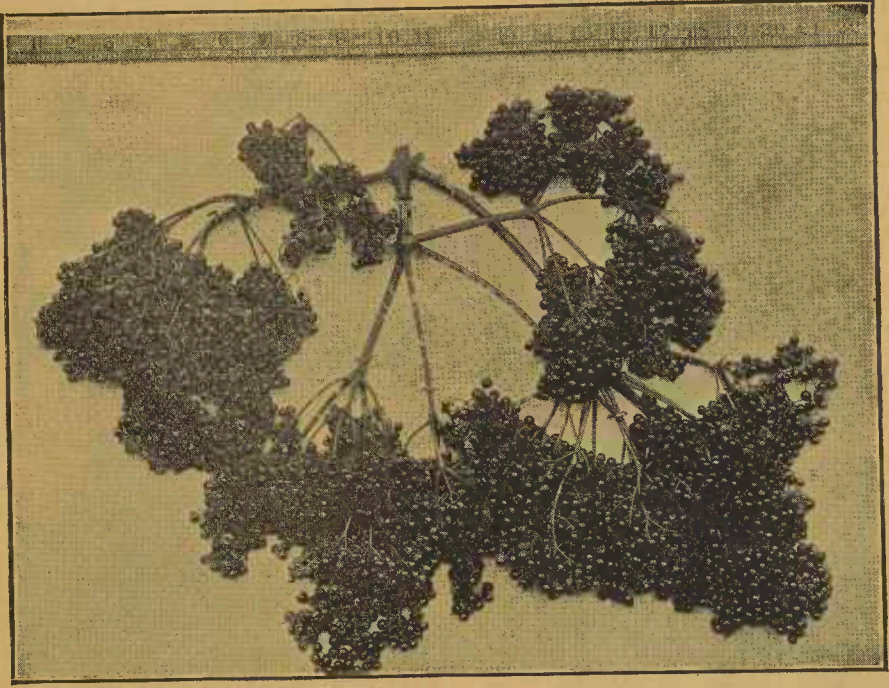

CONDITIONS HAVE CHANGED

It used to be uphill business to order plants and trees by mail, the difficulties of getting what one wanted and the excessive cost of transportation were great drawbacks. Now you can sit down to your writing desk or table, make out your order and send it to the nurseryman with the satisfaction of knowing that you will get what you want with as much certainty as though you stood before the counter in your favorite grocery and called for granulated sugar. The transportation companies, whether express or parcel post, charge but a fraction of what used to be taxed you. So small is the transportation charge that you could not afford to make a personal visit to your favorite nursery, even if it were in your own city.

HOW TO GROW STRAWBERRIES IN A BARREL

An Essay, by L. J. Farmer, showing how people who have but roof gardens or a few feet of back stoop can grow a few strawberries for the table. Also convenient exhibiting strawberries at fairs, exhibitions, etc., and the Barrel of Strawberries as a front yard ornament. Price 10c.

Address L. J. FARMER, Pulaski, N. Y.

ADAMS IMPROVED ELDERBERRY No. 2

The single stem head shown here was 20 inches in diameter, contained 5,169 berries and shelled 1 1/4 quarts. The result of ten years' work in improving a strain to produce a hardy and prolific bush bearing large, pulpy berries with few seeds. Everyone likes Elderberries, and up to the present time the only way to get them was out in the woods and pasture lots. Here is an improved variety, and a few bushes in a corner of your yard or garden will produce all you want

and the berries are larger and finer than the wild variety. Convenience added to a better product should appeal to every lover of this fruit.

We now have on hand a limited supply of year-old plants which I will sell at the following prices:

Single Plants.....	\$.50
6 Plants.....	2.50
1 dozen Plants.....	4.50

**A NEW VARIETY OF OATS
‘Pulaski’**

I have named this new oat after my home town. It is the result of a lifetime spent by a Swedish expert in breeding new kinds of oats. It may not be generally known, but Sweden produces nearly all the new and desirable varieties of oats. This oat was picked out by an American expert, who was traveling that country, as the best oat to be found. We guarantee that there is no better oat in the world, and as every farmer knows that it pays to sow new seed every few years, it certainly will pay you to invest in this variety. The oats are very large, meaty, and the heaviest oats we ever saw. Price, \$1.50 per bushel; 10 bushels, \$12.50; sacks free. Good sample, 10c.

LONG DISTANCE SHIPMENTS

We make a specialty of shipping plants and other goods long distances by mail, express and freight. Thirty years of experience has taught us some things about packing. Our customers write us that our packing is the best in the world. We rarely ever have a complaint, due exclusively to the long distance that plants have to travel. We mention this because we often receive letters asking us if we can safely send plants to California, Washington, British Columbia and other distant places. During the past year we have shipped plants safely to England, Switzerland, Japan, New Zealand and other foreign countries. Because we solicit distant orders, it does not signify that we neglect orders nearer home. We appreciate all orders and try to please all our patrons.

HYBRIDIZED FRUIT SEEDS

Hybridized Grape Seeds, 25 seeds for 15c; 100 seeds, 35c. Hybridized Gooseberry Seeds, 25 seeds for 15c; 100 seeds, 35c. Hybridized Currant Seeds, 25 seeds, 15c; 100 seeds, 35c. Elderberry Seeds, 25 for 15c; 100, 35c.

THE ADMIRAL DEWEY POPCORN

For the past three years we have had very unfavorable seasons for growing corn. It has been too cold part of the time and too wet or too dry the rest of the time. Even early varieties of field corn have not properly matured. We have been planting the Admiral Dewey popcorn during these years and it has come the nearest to maturing of any corn we have tried to grow. In 1913 we planted a field with it June 20th and, although we had a killing frost September 10th, we secured quite a crop. In 1914 we planted several acres, and in spite of severe and unprecedented drought in the most critical time, we secured a fair crop. I know of no variety of corn that will mature in such a short time. As a corn to pop, it is unsurpassed in value, being of good flavor and much sought after by those who appreciate good popcorn. We sold most of our supply for family use, but offer a few bushels at the following prices: 10c per ear, 6 ears for 25c, postpaid. 1 peck, \$1.00; bushel, \$3.50.

FRESH PICKED FRUITS FOR SALE

We can supply fresh picked berries in their season and also other kinds of fruits. Our crates hold 8, 12, 16 and 32 quarts each. If you want but four quarts, we will ship in a “handy” or picking stand for which an extra charge of 10c is made. We make no charge for crates when over four quarts are ordered. Strawberries in June and July, 10c to 15c per quart, depending on the time and the variety. Strawberries in August, September and October, 20c to 25c per quart, depending on the variety, season and supply. Black, purple and red raspberries in July, 10c to 20c per quart, depending on supply and variety. Gooseberries, currants and cherries in July, 10c to 15c per quart. Blackberries in August and September, 10c to 15c per quart. Plums, pears, peaches and apples in August, September and October, at market prices. Correspond with us beforehand for definite information. We can supply enormous quantities of strawberries and black raspberries, especially.

THE CARRIE GOOSEBERRY

This new variety originated in Minnesota and is, we believe, the best variety for health, yield and profit now before the public. We have had it growing several years and cannot say too much in its favor. It is a red gooseberry, larger and deeper red than the Houghton. A leading grower of Minnesota writes of it as follows: "I feel that I cannot be too strong in the praise of this wonderful new gooseberry. I have tried it out to my own satisfaction and find it everything that is claimed by the originator. The plants are of the upright nature and grow very fast, coming into bearing the year after setting, which has not occurred in my experience in any other variety. My plants raised fruit enough the second year, after setting, to more than pay for them. They seem to be immune from disease, as I have them near other varieties with mildew, but the Carrie has never mildewed with me yet. They are practically thornless." Another leading nurseryman writes: "Special attention is called to the Carrie Gooseberry, which we believe, all things considered, is one of the best varieties for northern culture that has ever been put on the market. It is vigorous, hardy and very productive. It has a very thin skin and yet is firm and a good shipper. Free from mildew entirely. Far more prolific and successful in this section than other varieties." Medium sized plants, 20c each; dozen, \$2; 100, \$10.

A Branch of Carrie Gooseberry

INFORMATION DEPARTMENT

Ask Us Questions. We are willing and anxious to answer any questions that our patrons may ask in regard to fruits or fruit culture. If we cannot answer this ourselves, we will turn it over to somebody who can answer it. Our long experience in the Fruit Business has put us in position to know who are the best authorities on any phase of the subject. Write us what you want, but be brief. Do not write us long letters. If you come to see us, wait until the busy shipping season is over. We are so busy during the packing season that it is impossible to entertain our friends as we would like and their presence often reduces the efficiency of our workmen.

Farmer's Tool for Setting Strawberry Plants

We have tried everything in the line of tools for setting strawberry plants; there is nothing equal to our Adz Shaped Setter. We have used this tool for over twenty years. It is simple in construction, costs but little, does not get out of order and is always ready for business. It is the best tool for heeling in black raspberry tips and setting any kind of berry plants, as well as strawberry plants, that we have ever used. It is hand forged and will last most people a lifetime. We have had such a call for them by people who have seen our men use them, that we have decided to have a quantity made and offer them to our patrons. Price \$1.00 each.

POT GROWN STRAWBERRY PLANTS

During July, August and September, we will supply pot grown plants of most standard varieties at the following prices. We like to know your wants in this line as far ahead as possible. Price, 25 for \$1; 100, \$2.50; 1,000, \$20.

TRANSPLANTED STRAWBERRY PLANTS

For planting in late June and July. Nothing equals our transplanted strawberry plants. We take up plants from the beds in April and heel them in by themselves, closely together, keeping them watered and sprayed. These plants, when taken up to transplant, do not suffer the set back that ordinary plants do, but start and grow right along. We will supply all such plants at an advance over regular prices of 50c per 100; \$3.50 per 1,000. This extra charge is made to cover cost of heeling in, and extra pains in taking up. They are more than worth the extra cost.

Strawberry Seeds Grow on Outside of the Berry

FALL BEARING STRAWBERRY SEEDS

(True Hybridized Seeds)

During the past summer we saved the seeds from 200 quarts of Fall-bearing Strawberries, and now offer them to our patrons at 25c per packet of about 500 seeds. These seeds, if planted in March or April, will produce fruit in the fall of 1916, if proper care is given. If planted any time during the spring or summer of 1916, they will bear fruit in the fall of 1917. I do not advise depending upon these seeds to get a supply of strawberries, but it is a very interesting pastime to grow new seedling strawberries and it may result in securing a variety that will surpass any of the fall bearing kinds now in cultivation. It will be possible for people in distant countries to supply themselves with fall bearing strawberries by planting these seeds when it would be impossible to make plants endure the long transit. Every seed will produce a new variety; it may be better and it may be inferior to the parents. The new varieties will have all the different shapes, shades and flavors and it will be interesting to watch the results. The most of the seeds are from Autumn and Productive, fertilized with Americus, Francis, Progressive and Superb. Each packet has printed instructions, showing how to grow and care for them. Price, 25c each; 5 packets for \$1; 10 packets, \$1.50.

Mr. Burt Mitchell, of Pulaski (Florist), sowed a packet of our seeds February 24th, 1913. He picked ripe berries from these plants August 4th of same year.

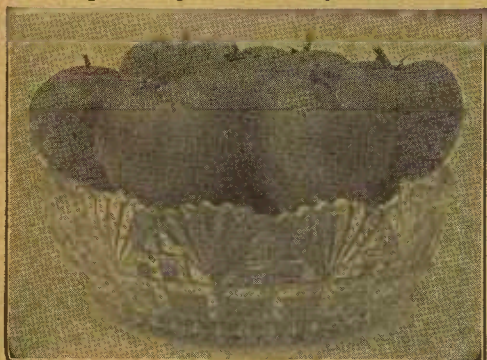

Photo of Potato Seed Balls, natural size. It is from these that all valuable new varieties of potatoes are produced.

HYBRIDIZED POTATO SEED

From the Seed Balls—Headquarters Stock

Millions never saw a potato seed ball. Thousands have tried in vain to get the seed. Now is your opportunity. This remarkable seed will produce an endless variety of new kinds. Your fortune may be in one of them. They are as easy to grow as tomatoes.

Growing new and distinct seedling potatoes from the Seed Ball Seed is intensely interesting. They will be the greatest curiosity of your garden. This seed will positively produce innumerable new kinds, colors, shapes, sizes and qualities. The product will astonish you. Some may be of immense value and bring you a golden harvest. Every farmer, gardener and bright boy should plant a few packets. You may be one of the lucky ones. 1 packet, 15c; 2 for 25c; 10 packets, \$1.00.

SUDAN GRASS

It is a tall, annual grass reaching a height of 7 to 9 feet when planted in rows and allowed to mature for seed crop; broadcasted and cut in the bloom for hay, about 4 feet. The results have been so satisfactory that it is now established as one of our permanent forage crops. It is easily cured and handled as a hay crop. Stock of all kinds eat it readily and will leave any other hay for it. The food value is second only to Alfalfa. Should not be planted until the soil becomes warm in the Spring. Two to four cuttings per year can be obtained when sown broadcast for hay, the number of cuttings secured depends upon the length of the season and the moisture. The first crop will mature in from 50 to 60 days, and the second crop is ready for harvesting in from 20 to 30 days. Three tons of cured hay per cutting per acre has been secured, and three cuttings made. It is a great drought resister and is particularly adapted to semi-arid regions. It is an annual and must be seeded each Spring. When seeded in rows 18 to 20 inches apart, drill 4 to 6 lbs. When sown broadcast, 16 to 24 lbs. per acre. Lb., 50c; 10 lbs., at 35c; 100 lbs., at 25c.

"JOHN BAER" TOMATO

The Earliest and Best Tomato on Earth

- 1st—"John Baer" Tomato produces large, beautiful, solid shipping Tomatoes in 30 days from large, strong, well matured plants grown in Veneer or paper bands, with roots undisturbed.
 - 2nd—"John Baer" Tomato produces the most perfect High Crown Tomatoes ever grown, entirely free from core.
 - 3rd—"John Baer" Tomato produces an enormous crop of Tomatoes, 50 to 100 fruit to each plant.
 - 4th—Every "John Baer" Tomato ripens evenly, right up to the stem.
 - 5th—No cripples, no scalds, no blight, no cracked, no wrinkled, no one-sided, uneven, scarred fruit. When dead ripe "John Baer" Tomato will not burst.
 - 6th—"John Baer" Tomato has a wonderful glistening brilliant, bright red color.
 - 7th—"John Baer" Tomato has a mild, deliciously sweet flavor. The finest flavor you have ever tasted.
 - 8th—in shape and form exactly perfect.
 - 9th—"John Baer" Tomato is almost seedless; it requires 6 to 8 bushels of "John Baer" Tomatoes to make one pound of seed; a marvelous Stem Setter, often ten fruit in first cluster, solid and meaty.
 - 10th—"John Baer" Tomato has just enough foliage—will stand plenty of manuring without going to vine. Set plants 3 x 3 1/2 feet.
 - 11th—"John Baer" Tomato is the most perfect shipping Tomato ever grown—24 fruit exactly fill a six carrier basket.
 - 12th—Each beautiful "John Baer" Tomato weighs about 6 1/2 ounces.
 - 13th—"John Baer" Tomato Seed was saved only by John Baer, the originator, who personally selected and picked every Tomato from which he saved this seed, selecting only the most beautiful, perfect fruit of the Early Stem Set Clusters.
 - 14th—"John Baer" Tomato is the offspring of two marvelous Tomatoes—One Great Specialist having devoted ten years in selecting and improving one parent and another expert devoted five years in selecting and improving the other parent. The "John Baer" Tomato is, therefore, the result of Fifteen Generations of Improvement and Selection for earliness, quality, shape, fruit, color and shipping quality.
 - 15th—As a Packing Tomato, "John Baer" is a miracle. They all pack Fancy, no seconds, and all pack whole. Peelers can prepare three bushels "John Baer" Tomatoes to one bushel of any other Tomato. Being such a tremendous yielder, a bushel of "John Baer" Tomato can be gathered in one-third the time of any other Tomato. A large Baltimore Tomato Packer, had all the "John Baer" Tomatoes he could secure packed separately, running them through a special process for his fanciest trade and his own private use.
- Prices: Pkt., 25c and 50c; 1/4 oz., 75c; 1/2 oz., \$1.00; oz., \$2.00; 1/4 lb., \$7.50; pound, \$25.00. Post paid.

"EVERGREEN BITTERSWEET"

Photographed March 15, 1915, by Adolf Müller

Euonymus Radicans Var. Vegetus, the Evergreen Bittersweet, so called because of the profusion of red berries it bears in fall and winter, and it is a picture to behold to see a wall covered with its healthy green colored foliage any time in winter. No matter whether severely cold or mild weather conditions, the leaves are entirely unaffected and are as pretty green in February or March as they are in June. While the leaves of the English Iyvs are brown and generally discolored, the Euonymus rad. vegetus is ever the same uniform color. It deserves a trial and will beautify old stumps, garden walls or even embankments at any exposure north or south. The fruiting is best on southern exposures. Wall pockets are fine to plant them in.

This plant is destined to become the most popular of all evergreen climbing plants ever known. It absolutely holds the color at any season of the year. It grows moderately fast and to a good height. The plant in the cut is ten feet high and it has been cut back to this height (the height of the wall) several times. At the time this picture was taken, March 15th, 1915, there were many clusters of red berries in good color hanging all over the vine and many had been beaten down by rains. There are similar varieties that should not be confused with the genuine variety, as they do not possess all the good qualities of the true Euonymus radicans vegetus. I have the true stock at the following prices:

50c each; \$3.00 per dozen; \$15.00 per 100; \$125 per 1000.

BULL MOOSE

This is a medium to late potato and has been grown by us for two years. This potato is said to be a seedling grown on Long Island. Last year it was very dry here and yet we dug 280 bushels from only 12 bushels planted June 8th. Other varieties of potatoes with us were near a failure. The picture on this page is taken from a photograph of those potatoes dug in October. We had a heavy frost September 10th, which entirely killed the vines and cut short the yield considerably. In the spring of 1914 we planted several acres of this variety, and now have an immense crop. They averaged fully 300 bushels to the acre. Two small pieces planted July 1st yielded 400 bushels to the acre, as fine looking potatoes as we ever saw. The vines of Bull Moose are not rampant growers, just medium, but healthy, and they root deep. The potatoes are good average size, very pretty and regular in shape; in fact, the ideal market shape. The tubers are white, and have few eyes. The shape of the potato is very characteristic, having one deep dent in the end. It will outyield any variety we have ever grown. Price, 1 k., 75c; bushel, \$2.00; 10 bushels \$17.50.

A Typical Specimen of Bull Moose Potato, 500 Bushels for Sale.

THE IDAHO RASPBERRY FOR CANNING

On account of its peculiar agreeable acid flavor, the Idaho red raspberry is in great demand among canners who say that it makes better canned fruit than any other red raspberry that they can get.

HASTINGS

This potato was grown from the seed by a Mrs. Tackley, who lives fourteen miles from us. It was named and introduced by us a few years ago. We have sold it from one end of the country to the other and it has given universal satisfaction. The vines are extremely rampant growers and must have plenty of room in order to do well. It is a very late potato, and in order to come to full maturity, must be planted quite early. The tubers are extremely large, and in a favorable potato season we have seen specimens that weighed over three pounds, and the originator's son tells me that he found one potato that weighed eight pounds. One great point about this potato is, that although it is a very late variety, they may be eaten just as soon as dug and are of fine quality. I believe it is, without exception, the finest potato for eating that I have ever tasted. Grown side by side, it will outyield Carman and Rural New Yorker two to one. We could fill this book with testimonials in its favor. One man in

New Hampshire grew 138 pounds from one potato weighing one pound in one season.

A man in Oregon produced 140 potatoes weighing 98 pounds from one potato weighing one pound. Another party reported growing 90 bushels from one potato in two seasons. We are proud of the Hastings potato. Peck, 75c; bushel, \$2.00; 10 bushels, \$18.

THE CHAMPION K STRAWBERRY

This is a new variety, originating with Louis Hubach, who has probably originated more good strawberries than any other man in this country. It may be of interest to learn that he originated the Excelsior, Fremont, Williams, H. & H., and a score or more of other desirable varieties. The Champion K is an abbreviation of Champion Klondike. It is not the same as Stevens Late Champion nor the same as Klondike. It is a berry very similar in appearance to the Klondike, but is more productive and better in every way, and what is most important is adapted for growing in the North as well as in the South. Anybody who has noticed the first strawberries that come from Florida and Louisiana in early

spring, has wondered at the glossy waxen appearance of these first early berries. They look as if they had been turned in a lathe and polished or varnished. These berries are the Klondike variety, but this variety is not a howling success in the North, although it sometimes produces profitable crops. It is much thought of in Maryland and in places further south.

The Champion K is a seedling with Klondike blood in its make up and has all the desirable qualities of the Klondike with many other desirable features. It is not a Fall bearing berry, but Mr. Hubach sent me a quantity of these berries about January 8th and he reports that he has been picking them all the fall and early winter. A berry that will stand the freezing that this variety will is certainly a boon for many berry growing sections. Read the following letter from Mr. Hubach:

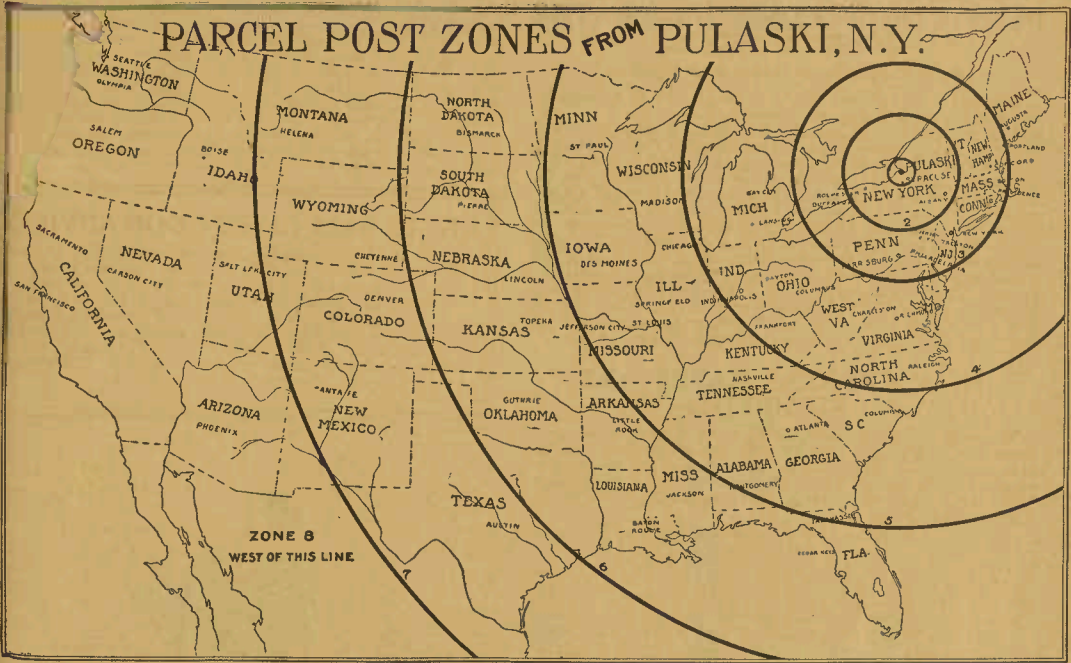

January 8th, 1916.

I am sending you to-day a small bunch of strawberries (Champion K), that I gathered yesterday. The sleet was on the timber. We have had one hard freeze before, but still we have strawberries. These were gathered out in the open field.

This is the Champion K, all the fall-bearing varieties have been killed some time ago. This is no fall variety, but we want to show you how it can resist the cold. We believe they are ahead of anything on the market. We have had berries on exposition for the past thirty days. Would be pleased to have you assist us in introducing it.

Very truly,

LOUIS HUBACH.

By referring to the Parcel Post Map above, you can easily see in what zone you are located, and from rate table you can easily determine the amount of postage required.

WEIGHTS

Parcels up to 50 pounds can be sent by Parcel Post in the local, first and second zones, and up to 20 pounds in all other zones.

To points further than the second zone on weights of over 10 pounds, the charge by freight or express is usually more economical.

Parcels, 4 ounces or less are mailable at the rate of one cent for each ounce or fraction thereof, and packages of plants or seeds weighing over 4 ounces and up to 8 ounces at the rate of 1/2c per ounce, regardless of distance.

SIZE OF PARCEL

Size of package that can be sent by Parcel Post cannot be over 72 inches in length and girth combined.

C. O. D. By Mail. If your Postoffice is a Money Order office we can, if you desire, and if it is more convenient for you, send anything you want out of this List

by Mail, C. O. D. (Collect on Delivery), if you want it this way; you need to send only one-quarter amount of your order.

ESTIMATED WEIGHT OF PLANTS, PACKED FOR SHIPMENT

100 Strawberry plants.	4 lbs.
100 Raspberry plants.	8 lbs.
100 Dewberry plants.	6 lbs.
100 Blackberry plants.	8 lbs.
100 Currant plants.	10 lbs.
100 Gooseberry plants.	12 lbs.
100 Grape Vines.	16 lbs.
100 Asparagus plants, 2 yr.	6 lbs.
100 Rhubarb plants.	10 lbs.

We will prepay the postage if money is sent for this purpose, but we prefer that you have your plants come by Parcel Post C. O. D. for the amount of postage.

PLANTS NOW COME UNDER THE ZONE SYSTEM

How Parcel Post Rates Are Figured

Regular merchandise (fourth class mail) is figured by the zone system, same as express. For the first (50 mi.) zone it is 5c for 1 lb., and 1c for each additional pound. For the second zone (not over 150 miles from Pulaski), it is 5c for 1 lb., and 1c for each additional pound. For the third zone (151 to 300 miles from Pulaski), 6c for 1 lb., and 2c for each additional pound. For the fourth zone (301 to 600 miles from Pulaski), 7c for 1 lb. and 4c for each additional pound. For the fifth zone (601 to 1,000 miles from Pulaski), 8c for 1 lb. and 6c for each additional pound. For the sixth zone (1,001 to 1,400 miles from Pulaski), 9c for 1 lb. and 8c for each additional pound. For the seventh zone (1,401 to 1,800 miles from Pulaski), 11c for 1 lb. and 10c for each additional pound. For the eighth zone (over 1,800 miles from Pulaski), 12c for 1 lb. and 12c for each additional pound.

HOW EXPRESS RATES ARE FIGURED

Express rates are now figured on a graduated scale from 1 pound to 100 pounds. To show our patrons what this means, we will give an illustration of the cost of sending packages of plants from Pulaski to Milwaukee, Wis., weighing from 1 pound to 100 pounds. The following are the charges:

1 lb.\$.22	35 lb.\$.68	69 lb.\$ 1.19

REDUCED EXPRESS RATES

Is the Millenium Coming?

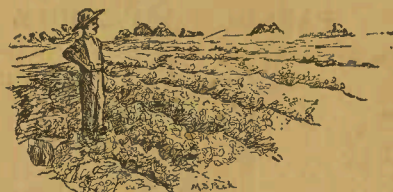

It will be a great satisfaction to many to learn that the express companies have, on account of the competition of the parcel post and the pressure of the Interstate Commerce Commission, reduced their rates about 20 to 50 per cent. all along the line. To illustrate how this works out, I will give two examples. Formerly, the regular rate for 100 pounds of merchandise to Chicago was \$2.50, the rate on trees, plants and seeds was \$1.90. The new rate is \$2.00 on regular merchandise, and \$1.50 on seeds, trees and plants. On a 10 pound parcel of plants to Chicago, the former rate was 35c; the rate now is 29c. The former rate on 100 pounds to Los Angeles, Calif., was \$9.60 for plants. It is now \$7.20. On 10 pounds to Los Angeles, it used to be \$1.14. It is now 86c. The most important change, it seems to me, is when a package goes over two express companies. In the past I have lost much trade by patrons getting disgusted over having to pay two rates when the package went over two companies' lines. Now the rate is estimated on the distance from the shipping point, regardless of the number of companies that the package travels over. A circle is drawn about the shipping point, same as the zone by the

parcel post system, and all places within the circle have a certain rate. The rate on 10 pounds of plants to Scranton, Pa., is 25 cents, and other places in Pennsylvania that have formerly been discriminated against, because they were on the Adams or United States, or other express companies, can now get packages from us at proportionate rates. I believe that this announcement will lead to many sending their orders to us, who have formerly not traded with us, because we could ship only by the American express from Pulaski, and their express bill has been too high.

UNCLE SAM GIVES GOOD ADVICE

"If the farmer makes his purchase direct from the nurseryman, he will save the expense of the middleman or agent, and is less liable to the mistakes and injury that may occur through repeated handling. The selection of trees is a very important part of orcharding, for upon care and judgment in this matter depend largely the future profits of the investment," says U. S. Dept. of Agriculture, Farmers' Bulletin No. 113.

And has his winters for study and leisure.

EXTRA LARGE SIZED PLANTS

People often want plants and trees for immediate effect. They want results right along. It is sometimes impossible to supply plants or trees for immediate effect when they are in full leaf, but if extra large sized berry plants are dug carefully while they are dormant, they will begin to fruit that same season they are set out and you will get quite good results. Extra large sized fruit trees will begin to fruit sooner than small trees, but of course it is impossible to get much fruit from any fruit tree the first year it is set. Peaches, plums, cherries, pears and some varieties of apples will fruit in a year or two after they are set out if conditions are favorable. Strawberries, raspberries, blackberries, currants and gooseberries will bear the same year they are set out if carefully planted while the plants are entirely dormant in early spring or the fall before. Of course, the plants must be well developed specimens, the larger sized the better the results. Ornamental trees and shrubs, roses, etc., will often blossom and make a good showing the first year if set early in the spring or the fall before. We favor fall planting where the winters are mild, for all kinds of plants, vines and trees; and very early spring planting where the winters are severe. It is all right to plant hardy plants, vines and trees in localities where the winters are severe, if the plants and trees are thoroughly ripened and matured before taken from the nursery in the fall. We do not make it a practice of stripping leaves from fruit trees that we sell in the fall. We think that stripping the leaves from trees or plants before they mature, weakens the specimens for standing the winter, and if trees are ordered early in the fall, we ship them with leaves on them. Our prices for plants, vines, shrubs and trees for immediate effect, large sized perfect specimens, is just double the ordinary prices charged in this catalogue. Better tell us just what you want and get prices by mail.

FALL BEARING STRAWBERRIES

The following article appeared in the January 16th issue of Farm and Fireside, and was written by the famous seedsman, Henry Field. The article is so good, and so instructive, that we reproduce it entire.—L. J. F.

REAL EVERBEARING STRAWBERRIES

(By Henry Field)

I suppose you think the everbearing strawberries are a fake and a fraud and a few more unpleasant things. I don't blame you. I used to think so.

I had them growing in my garden for four years before I was convinced. I didn't even tell anyone that I had them, and I didn't give them a fair show. I had them crowded in an out-of-the-way corner among some other

as full as mine did the second spring (13 months from the time they were set). This after they had already borne the previous summer.

Then they keep on bearing and blooming all summer without a stop. Not so heavy as they did in June, but some berries all of the time, and an extra heavy setting in September and October. They are the only strawberry that will give you any returns the first season you set them. With the ordinary varieties you wait a full year for fruit. With these you begin getting fruit within six weeks after they are set and more and more as the season advances. You get enough fruit the first year to repay you for the work and cost. The next spring you have a nice bed ready to make you a big crop in May and June. And after that, berries all summer. Sounds good, doesn't it? They will do it, too, if you give them good soil and good care.

You must remember, though, that you can't get some

L. J. Farmer's Children Picking Strawberries, September 30th, 1913

stuff, and in poor ground, but they bore all summer in spite of it, bore fairly well. All you could expect.

But I was like the man they tell about who saw a giraffe the first time. I was certain that "there hain't no such animal." Finally, though, I decided there was really something to them, so I planted them in good ground, two feet apart each way, tended them well, and gave them a decent show.

Well, I took it all back then. They yielded amazingly and kept it up all summer. Big, dark red, juicy berries of the finest flavor I ever tasted. Commenced bearing as soon as they were set out, and never stopped. Bore on the new young plant as soon as they were rooted. Bore all fall until the ground froze. Spread and made plants, and blossomed and made fruit, in spite of the fact that everyone in the neighborhood tramped over them, continually looking at them.

Big, Juicy Berries They Were

Last spring we set several acres and had berries all summer. Picked a lot as late as October.

They look just like any other strawberry—that is, any other extra good one. They are about the size of Warfield or Dunlap, maybe a little larger, very dark red, firm, and the sweetest, spiciest berry I ever tasted.

The plant is strong and vigorous and yields enormously. I have seen as high as 100 berries and blooms on a single plant. They bear at the regular season same as any strawberry, only heavier if anything. I never saw berries bear

thing for nothing out of these plants any more than with anything else. They must have good soil, good care, and plenty of moisture.

It's hard work bearing berries out of season and making plants too, and getting ready for a crop next spring. If they have to fight hard soil or thin soil, or weeds, or drought, they will simply give up and quit, and you can't blame them.

They Want Good Soil, Though

Give them the best soil that you have, the kind that would grow a good crop of potatoes, or corn, or onions. No harm to be a trifle heavy and moist. Set the plants early, the earlier the better. April is twice as good as May. Good distance for home garden is two feet each way. In the field one and one-half feet by three and one-half feet.

Keep the ground stirred and loose all the time. Never let a crust form or a weed start. If it gets terribly dry, irrigate if you possibly can. I like the overhead sprinkling system, but the ditch system is all right. Anyway, so you get the water to the roots. Stir the soil as soon as it begins to dry after watering, so as to stop evaporation.

I don't believe in clipping the runners or blooms. Let them do as they please. Mulch with straw or strawy manure or corn fodder when the ground freezes, and leave it on in the spring. It will keep the ground moist. The everbearing are perfectly hardy. No danger of their winter-killing.

The Variety That Suits Me

I prefer the variety known as the Progressive. There are lots of others and I have tried most of them. Have kept only Progressive, Americus, and Superb, and I find the Progressive by far the best of the lot. The description above refers to them. I don't think I will grow any other from now on.

It originated in Iowa, and is a cross between one of the French everbearing sorts and Senator Dunlap, the best of all the regular American varieties. The Progressive has all the good points of the American parent and the one good point of the French parent—continuous bearing.

It has come to stay, and the sooner you get started with it the better.

A Plate of Superb Won First Prize at N. Y. State Fair, September, 1914

I kept the blossoms pinched off until August, and they bore a fair-sized crop in spite of the dry weather. On May 19, 1915, we picked the next ripe berries from the Progressive plants. They bore a large crop, and before the berries were gone they were blooming for a second crop. We had berries all summer and fall; not just a few, but all we could make use of. We had two hard frosts, but on October 13th I picked nice large berries from the patch. The berries were of medium size and always had a delicious flavor. I think it is difficult to keep the buds pinched off the plants during the second year until late in the summer. Let them bear, and have berries every day. If you think you would like strawberry shortcake in July, August, September and October, as well as in May and June, plant Progressives next April.

L. CHENOWETH, Ohio.

In Feby., 1916, **Farm Journal**.

Mrs. Farmer's Handful of Superb Strawberries in September, 1914

The following was clipped from the January 2nd, 1915, issue of "The Farmer's Mail and Breeze," of Topeka, Kansas. One of the editors, Mr. Floyd B. Nichols, visited our place in September, 1913.

FALL STRAWBERRIES

"Fall strawberries deserve more attention in the home gardens of Kansas. It is possible to grow this crop in the fall quite successfully, if the fall varieties are set. L. J. Farmer, of Pulaski, N. Y., has several acres of fall strawberries, and he has done more than any other man in the United States with these varieties."

Mr. Van Wagenen, one of our best customers, who lives near Rome, N. Y., showing Strawberries, Apples and Green Corn, harvested the same day.

In announcing an article which appeared in the March 6th, 1915, issue of the Rural New Yorker, that paper says, "The time has now come when we can talk about the Fall Bearing Strawberry as a commercial proposition. Formerly it could only be regarded as a novelty, now it has a regular place in culture. The story will be told so as to give our readers the exact information about it." Look up the March 6th, 1915, issue of the Rural New Yorker for this article.—L. J. F.

FALL BEARING STRAWBERRIES

I have had the Progressive everbearing strawberry for two seasons and we certainly are delighted with it. I started with seventy-five plants a year ago last April.

HE LIKES THE FRANCIS BEST

The following article was written by one of my customers, Mr. W. T. Findall, of Michigan. He purchased his first plants of us in the spring of 1911. This article has appeared in a number of papers and is so interesting that we insert it here.

"Being a grower of small fruits and interested in anything pertaining thereto I was one of the first to plant the improved strain of Fall-bearing strawberries; therefore, have had several years' experience with them. Right here I wish to say that common kinds are being sold by unscrupulous parties as Fall-bearers on account of the demand for them at fancy prices; also some of the Fall

Mary Van Wagenen and Fruit Grown by her Father. Plants Purchased from L. J. Farmer

bearers are not very productive, and as a rule the shy bearing kinds are the most prolific plant makers and, therefore, sell cheaper and more of them are set; all this, with no knowledge of the proper method of growing them, has discouraged many.

"I have tried five of the most promising varieties and will endeavor to state briefly the method I use and the soil required to get best results with them, one of the most important things is to know your variety, for they are not all adapted to the same soils or treatment.

"The Productive and Superb should be grown in hills, for the young or runner plants do not bear the first season; they require a rich loamy soil and on such soils the plants grow very large and thrifty, but the fruit stems are short and the berries are hidden away under the leaves where the sun never sees them, and if the season is wet, which is very common, a great many of the berries will rot. With me both varieties were shy bearers, but made abundance of plants. The Productive having produced nearly one hundred young plants from one individual plant in one season.

"The Americus, Progressive and Francis do best in matted rows, for a great many of the young plants will bear the first season, but these varieties require different soils. The Americus will be very disappointing on sandy soil, but do well on clay or heavy soil. I consider this a very serious defect, for such soils are usually cold. As these berries run well up to Winter, it is necessary to grow them on warm soil to get best results. This is a good plant maker.

"The Progressive requires a rich, loamy soil, is very prolific, but the berries are inclined to be small, and are absolutely lacking in flavor. This will be a very serious handicap when these berries become plentiful. This is also a good plant maker.

"The Francis is by far the best of the varieties I have grown. The berries are large, well formed, of glossy

"I renew the bed each Spring, picking only the one season. In this way the ground is kept in much better condition and the berries are larger. During the early season I cultivate with horse and later by hand, working the ground frequently and keeping free from weeds at all times. I prefer this to mulching. I pick all blossoms up to July 1.

"I don't consider it good policy to grow these as common berries are grown, that is fruit the same beds from year to year, for if they are grown in hills and being fruited so late in the Fall they go into the Winter in such a weakened condition that a majority of the plants will not survive and it will be as much of a task to fill in and try to patch up the old bed as to set a new one. In the matted row system there will be so many plants it will be impossible to keep the blossoms picked off, and this is absolutely necessary to secure a good crop in the Fall. But on new set beds the task is not hard, for up to July 1st there is only the mother plant to pick.

"I could not raise a crop of Summer berries without irrigating, but have never had occasion to irrigate the Fall-bearers, for we always have plenty of rain at that season. Furthermore, the Summer berries are quite often ruined by frosts; not so with the Fall-bearing kinds, for if one set of blossoms are killed another will soon appear. Frequently a severe storm during the height of the blossoming period will also ruin the Summer crop, but with the Fall varieties blossoms are appearing and disappearing all the time, so you are sure to get some nice berries.

"I claim to be quite successful with Summer varieties, but can make more money in one season with Fall-bearers than in two seasons with common kinds, and with less work, am satisfied I can grow at least five thousand quarts of Francis per acre the first Fall, and as it will be some time before these berries sell below twenty-five cents per quart, what crop will pay better?"

W. F. TINDALL.

Strawberries, Popcorn, Celery and Pumpkins Harvested the Same Day, October, 30th, 1912, L. J. Farmer's Children

appearance and have an excellent flavor even in cold weather. They are very firm, which makes them a good shipper. I have sent them over one thousand miles by parcels post and they reached their destination in first class condition.

"This variety does best on sandy soil; the only fault being a poor plant maker. For this reason it is listed by but very few nurserymen and is more expensive. These plants do not require babying, as some would have you believe. In transplanting I have lost fewer of them than any variety I have grown. The mother plant will grow as large as any variety and is of spreading habit. I have plants eighteen inches in diameter and you could scarcely see the leaves for fruit stems and berries.

EVERBEARING STRAWBERRIES

Until recently most people have been skeptical about the everbearing strawberry. They have classed it with other horticultural sensations that have had dazzling careers in advertisements but disappointing ones with growers. The unanimous opinion now is that this type of strawberry has come to stay.

Editors "Country Gentleman."

EVERBEARING STRAWBERRIES

A Novelty that Has Become a Staple

From the "Country Gentleman" of Jan. 22nd, 1916

During the past few years many new varieties of fruit have been originated, and many of the old varieties have been improved through bud selection. Among the strawberries there have been innumerable new originations, among them the everbearers.

When these varieties were first introduced few growers had any faith in them, because they thought they were nothing but novelties. Those who have had experience with them, however, have learned that these everbearing berries are more than a novelty—they are a pronounced success.

Strawberry growing is my specialty. I have had twenty-five years' experience in the work, during which time I have been a close student of this profitable branch of horticulture. In all my experience I never have worked with varieties that have won greater admiration than the everbearers.

"Everbearing" is hardly an appropriate name for these varieties because they fruit only five to six months in the year. But they should not be called fall-bearers, because they fruit in the early summer as well as in the fall. But what's in a name? What concerns the grower most is: "Will they fruit continually from early summer until late fall?" To this question I unhesitatingly answer: "Yes."

One Plant of the Superb Fall Bearing Strawberry.

I am willing to stake my reputation as an authority on strawberries that within the next few years the everbearers will be as popular and as universally grown as the most popular and most profitable of the standard varieties. When the everbearers are properly grown there is absolutely no question of their success.

On account of their prolonged heavy fruiting habit it is essential to have the soil where the plants are set made rich and mellow. If any grower has ever failed to get satisfactory returns from these varieties, that failure has come through neglect to furnish the required amount of fertility.

It requires a certain amount of building material to develop strawberries, just as it requires a certain amount of material to construct a machine or building. The more building material the grower puts into his soil the more strawberries he will get, whether he grows standard varieties or everbearers.

The materials that build strawberries are nitrogen, phosphorus and potassium. The most essential of these, as far as the everbearers are concerned, is nitrogen. But it must be understood that nitrogen builds only the vegetative parts of the plant; without the two other essential elements a large plant growth would be developed without a satisfactory crop of berries.

GIVE THE PLANTS PLENTY OF FOOD

In all my experience in strawberry work I have found nothing so valuable as stable manure for furnishing the

nitrogen content. Sulphate of potash will furnish the potassium more economically than any other material, and bone meal is the ideal phosphorus carrier. Twenty to twenty-five tons of stable manure, two hundred pounds of sulphate of potash, and four hundred pounds of bone meal may profitably be used on each acre.

The fertilizing materials should be applied after plowing whenever possible, and should be thoroughly incorporated with the soil before the plants are set. This work is best done with such an implement as the disk or spring-tooth harrow, but any implement that will mix these materials thoroughly with the soil will answer the purpose.

Such heavy fertilizing as I recommend here will, of course, incur considerable expense. But it makes possible the growing of as many as 14,000 hills on a single acre, and each hill will have an ample supply of material from which to build and perfect its full share toward the berry crop. By following this method I make each acre do the work of two. And I wish to emphasize the fact that the most profitable and, in my judgment, the best way to grow the everbearing varieties is by the hill system.

The pleasure and profits of any business come through success, and success in growing strawberries comes through following intensive, rather than extensive, methods. No fruit will give bigger or quicker returns than strawberries, and this is especially true of the everbearing varieties. Everbearing plants that I set during April and May begin to fruit in August. In September the hills are loaded with the finest of berries.

The everbearing varieties mature their principal crop

of berries during the late summer and fall—just when strawberries are in great demand and prices rule high. I have in my possession sales reports from more than a dozen cities showing that Superb fall berries sold at thirty to forty-five cents a quart wholesale. Many crates of Superb berries were shipped more than a thousand miles, but they arrived in good condition and brought high prices.

I find the everbearers extremely hardy. I have grown them extensively in Michigan, Idaho and Oregon, and I find they succeed under varied soil and climatic conditions. My experience in growing these varieties by intensive methods has proved so profitable that I have prepared the soil for this year's planting more intensively than ever before. The more fertility I give these plants the more they give back to me.

Before going further I wish to explain the statement regarding the hardness of the everbearers. They are not only hardy in plant growth, but also in blossom and fruit. The blossoms are developed beneath the foliage, where they are protected from frosts, rain and the direct rays of the sun. This peculiar habit prevents the frost from injuring the blossoms. It also protects the berries from sun scald. I have repeatedly examined plants after a killing frost, and have seldom found a single blighted blossom. I have picked berries from these varieties every day for more than two weeks after the ground has been slightly frozen.

I am frank to say that Superb is my favorite market,

variety among the everbearers. I favor it because the berries are large, perfectly formed, beautifully colored, deliciously flavored, good keepers and exceptionally good shippers. Berries of this variety are grown in clusters and they circle round the plant under the foliage, which insures even ripening of the berries.

The casual observer, passing through a field of Superb plants, would hardly realize the presence of any berries until he lifted the foliage. He would then see clusters of blossoms, green and ripe berries in profusion.

The fruiting habits of Onward, Forward and Advance so closely resemble those of Superb that I am confident they will soon become as popular and as profitable for market purposes as Superb.

For home use Progressive is my choice. When plants of this variety are grown in hills in rich soil they develop to enormous size, and no variety can beat them either in quantity or quality of fruit. The berries, while not so large as those of the other everbearing varieties I have mentioned, fully equal and I believe surpass them in quality.

standard varieties still hold the important place which they justly deserve, and I am confident that it will be a mistake for any grower to ignore the standard varieties, which always have been and I believe always will be profitable.

I hope this article will remove any doubt regarding the value of the everbearing varieties which may exist in the minds of any growers. I know there are many who have never tested these varieties who question their fall fruiting, because many letters come to me asking if it is true that these varieties will fruit from summer to late fall. This question is answered with the one statement:

You simply cannot keep them from fruiting unless you pick their blossoms from June until November. They are the most persistent plants in their fruiting habit I ever have known.

I realize that I have made strong statements regarding these everbearing varieties, but I have set down nothing but facts, and still the half has not been told.

F. E. B.

Plants in Fruit and Baskets of Berries of Francis and Americus, November, 1911.

Americus is a heavy fruiter, but my principal objections to this variety are that the berries grow close to the ground and their fruiting stems extend above the foliage, giving them no protection against frost and other elements. The berries, however, are of splendid quality, and in some sections, especially the state of New York and the New England States, Americus is a strong favorite. I cannot say anything in favor of Productive, except that it is a heavy fruiter in the spring. In a very few localities it has some admirers, but I should not recommend it either to the commercial grower or the home gardener.

While I am very enthusiastic over the everbearers, I would not advise anyone to set them exclusively. The

I LIKE AMERICUS BEST

Of all the fall bearing strawberry varieties, I like Americus best. It is not that the others are not good, but Americus is so much superior to the others in many ways that I prefer it and almost invariably recommend it to others. The plants do pretty well on most any kind of soil, but do their best on a rich soil, naturally moist, with plenty of clay in its make up. You can hardly get the soil too rich for Americus. While the plants do better on wet soils than other varieties, they will stand more drouths and dry weather than any variety we know. When it does not rain for weeks and weeks at a time, the Americus plants will continue to bear immense crops of

fruit in the fall, if they are stirred and cultivated. The past two falls, 1913 and 1914, have been extremely dry, and yet we have picked enormous crops from the Americus plants all through August, September and October. What I like best about the Americus is its fine quality. Whether picked in June or in the fall, it is the finest flavored strawberry I have ever eaten and everybody else tells me the same. When once we sell them to a customer, he comes back for more of those fine flavored berries. Such fine flavored varieties as Ridgway, Marshall, Jessie and Sharpless are inferior in flavor to Americus. A few baskets set in a closed room over night will permeate the atmosphere with an order reminding one of the stories of the Garden of Eden. When I exhibit at the State Fair in Syracuse, the people will throw up their hands and say "Strawberries!" just as soon as they come inside the building where our berries are placed. The delightful aroma from the Americus permeates everything near it. If you want to please yourself and everybody else, plant the Americus.

L. J. FARMER.

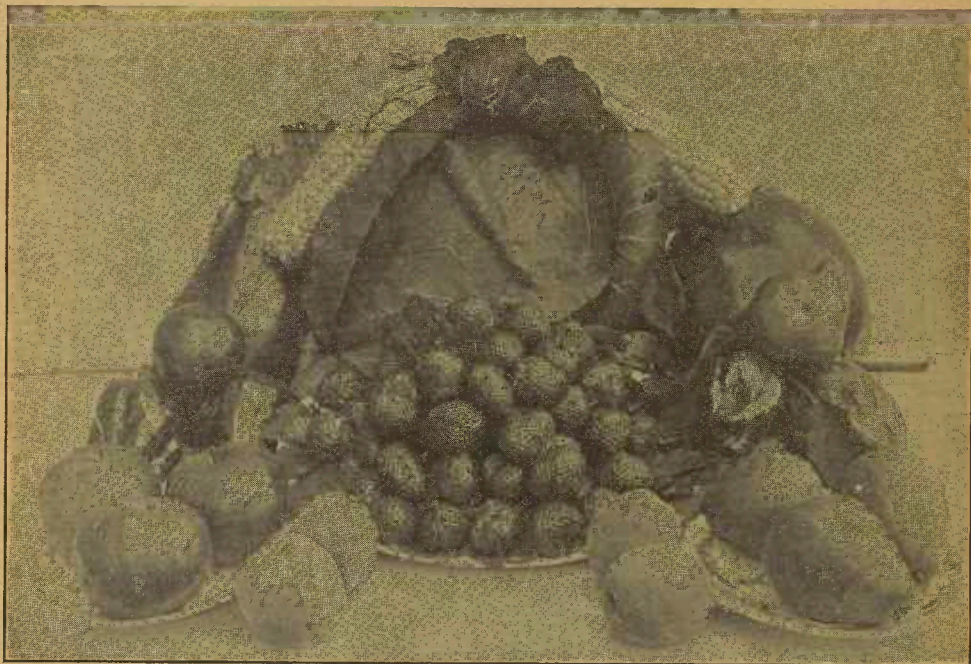

SPECIAL BARGAINS

Extra Large Size Trees & Plants

Grapes We have the following quantities of grape vines three and four years old, extra large-sized plants that we will sell at same price as regular sized two-year vines, so long as they last: 230 New Belle, 30 Niagara, 16 Delaware, 50 Worden, 24 Green Mountain, 32 Brighton, 23 Catawba, 12 Diamond, 8 Lindley, 12 Moore's Early, 15 Agawam, 10 Pocklington, 1125 Campbell's Early, 1,000 Concord.

Gooseberries 3,000 Houghton, 1,100 Carries, 300 Downing, 39 Crown Bob, 250 Josselyn, 18 Chautauqua, 15 Carman, 47 Industry, 98 Keepsake, 70 Portage, 30 White Smith.

Currants 2,000 Perfection, 1,000 Fay, 500 White Grape.

Fall Strawberries, Green Corn, Cabbage, Eggplant Fruit, Tomatoes, Peppers, Apples, Pears, Peaches, Photographed October 20th, 1915

FORTY CRATES OF FALL STRAWBERRIES PER DAY

The Maplehurst Gardens of Michigan, the largest growers of Fall-bearing strawberries for fruit alone in the world, write the "Country Gentleman," of Philadelphia, September 19th, 1915, as follows: "Since the 15th of August we have been picking on an average about forty crates of strawberries a day. These berries have gone to Chicago, Cincinnati, Philadelphia, Milwaukee and many other cities, and have sold for as high as thirty-five cents a quart, wholesale."

This firm writes us as follows, January 17th, 1916:

L. J. FARMER.

Dear Sir:—Upon checking up our records for the year, we find that "Superb" yielded 90% as much fruit per plant as "Progressive," and we received a price for Superb averaging more than double the price for Progressive because of the much more attractive appearance of the fruit, and because it reached the market in much better condition. We shall, therefore, set no more Progressives. Inasmuch as we have been the largest producers of ever-bearing strawberries in this country, as far as we know, we think this experience should be of value as a guide to other producers. It may not be out of place to say that we shall set upwards of three hundred thousand Superbs for fruit this spring, and all of these will be grown by the hill system.

Apples 53 R. I. Greening, 370 Oswego, 600 Northern Spy, 12 Winter Banana, 5 Rome Beauty, 2 Yellow Transparent, 10 Red Astrachan, 1 Baldwin, 3 Gano, 1 King, 1 Opalescent, 7 Strawberry, 2 Hubbard-stons.

Pears 55 Clapp's Favorite, 3 Kieffer, 3 Sheldon, 5 Flemish Beauty.

Peaches 600 Elberta, 80 Niagara, 25 Salway, 75 Champion, 40 Carman, 60 Early Crawford, 120 Late Crawford, 20 Triumph, 6 Belle of Ga., 2 Stump, 1 Earl of York, 2 Kalamazoo, 10 Admiral, 21 Beer's Smock, 3 Old Mixon, 30 Fitzgerald, 99 Mathews' Beauty, 30 New Prolific, 25 Capt. Ede.

Surplus Strawberry Plants Sometimes we have a lot of plants left of some variety that there has been little call for. These may be of the more expensive kinds that we have charged three times what you will have to pay for them. Towards the close of the season, we may be glad to get rid of them at a moderate figure. We agree to put in only good kinds, but cannot guarantee any particular variety when you order. When your order is filled, the varieties will be labeled so you will know what you get. Price of surplus strawberry plants, 25 plants for 20c; 100 for 50c; 1,000, \$4.00.

THE NEW OSWEGO APPLE

Evidently a cross between Northern Spy and Spitzenburgh.

Trees thrifty growers, almost identical with Northern Spy.

The original tree was discovered growing up between the branches of an old Northern Spy tree which had borne so heavily that the branches had split from the trunk and lay prostrate on the ground. The bright red apples were in striking contrast to the streaked fruit of the Spy. This was in 1906. The original tree has borne a crop of fruit every year since, eleven years in succession.

The fruit is a showy deep red and in a natural state has a beautiful blue bloom. When polished it is unsurpassed in beauty. It averages the size of Northern Spy, which it closely resembles, except in color, but has small dots near the calyx end instead of streaks. It keeps later than Northern Spy. The quality suggests a cross of the Spy and Spitzenburgh. Originated by D. D. Tryon and introduced by L. J. Farmer.

First Class Trees, \$1.00 each; \$7.50 per 12; \$50.00 per 100.

JUST A FEW WORDS ABOUT THE NEW OSWEGO APPLE, TAKEN FROM LETTERS RECEIVED

Painesville, Ohio, Jan. 2nd, 1915.

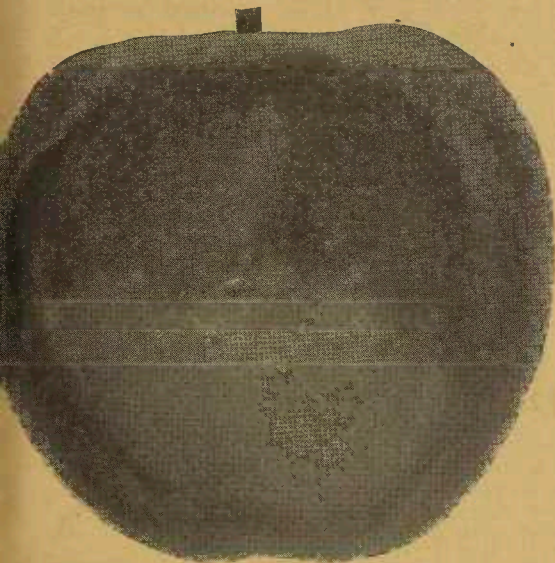

It is certainly a mighty pretty fruit, if they all color up as well as this does, and very good quality indeed.

THE STORRS & HARRISON CO.

New Haven, Connecticut, Dec. 31st, 1914.

The color and general appearance of the sample is immensely pleasing.

THE ELM CITY NURSERY CO.

**A Perfect Specimen of Oswego Apple
(Cut taken from Rural New Yorker)**

Berlin, Maryland, Dec. 31st, 1914.

Received the sample Oswego apple. This apple seems to be of very good quality.

J. G. HARRISON & SONS.

Lake City, Minnesota, Dec. 31st, 1914.

We are in receipt of your letter and the sample Oswego apple. The fruit seems to be very nice. It is highly colored. The flavor is good and it is evidently a good keeper.

THE JEWELL NURSERY CO.

Louisiana, Missouri, Jan. 7th, 1916.

We are glad to have the opportunity of testing the quality of this variety. The color is very fine indeed.

STARK BROS. NURSERIES & ORCHARDS CO.

Albert Lea, Minnesota, Jan. 1st, 1915.

The apple, both in color, size, shape and quality, is beyond reproach, and as you say, it gives great promise of being a splendid thing.

CLARENCE WEDGE,

The Wedge Nursery.

Girard, Pa., Feb. 9th, 1915.

I received the sample apple and think it very fine.

M. L. SWEENEY.

Des Moines, Iowa, Jan. 2nd, 1915.

The color and texture and quality are in my judgment good enough to justify extensive cultivation and trial under conditions something like Oswego County, N. Y.

C. L. WATROUS.

Des Moines, Iowa, Jan. 2nd, 1915.

We are in receipt of the sample of Oswego apple. It came in splendid condition and gave me a chance to judge of the fruit, both as to quality and keeping characteristics. You certainly have an apple of a good deal more than ordinary quality, being mild, sub-acid, firm and a splendid dessert apple. Its color being deep red is in its favor. As an eating apple, it is ahead of the Jonathan, judging from the specimen.

If it is a good tree, hardy and a good bearer, you certainly have a good thing.

M. J. WRAGG, Mgr.,

The Wragg Nursery Co.

Winona, Ontario, Jan. 2nd, 1915.

We have sampled this apple and are much pleased with the general appearance and flavor.

E. D. SMITH & SON.

Girard, Pennsylvania, Jan. 2nd, 1915.

We received the specimen apple and assure you that we consider it very fine.

PENNSYLVANIA NURSERY CO.

Shenandoah, Iowa, Jan. 1st, 1915.

It has a nice appearance and splendid color, which would indicate that it ought to have a future.

E. S. WELCH.

Geneva, New York, Jan. 5th, 1915.

It certainly is a handsome apple, with a decided pinkish red and a very tender fleshed apple.

W. L. MCKAY.

Dansville, New York, Jan. 5th, 1915.

The apple looks and tastes as though it may become popular.

WM. J. REILLY.

Odessa, New York, Jan. 4th, 1915.

The appearance of this apple is very fine.

ELMER SHERWOOD.

Orencia, Oregon, Jan. 5th, 1915.

Received sample of Oswego apple, which came through in good condition and appears to be an apple of fairly good quality and texture. We would like to have you send us two trees that we may test them.

OREGON NURSERY CO.

Rochester, New York, Dec. 31st, 1915.

The new Oswego apple to hand, and which we note as of excellent appearance, being highly colored and very attractive and of good flavor. It ought to be particularly in demand as a table apple.

RALPH T. OLCOTT,

Pubr. "American Fruits."

Rochester, New York, Dec. 29th, 1915.

We are in receipt of an apple called the Oswego, which has a very good flavor.

ALLEN NURSERY CO.

Dansville, New York, Jan. 5th, 1915.

Sample of Oswego apple received some days ago; the same is very attractive and of good quality in view of its productiveness, I am satisfied it will prove valuable.

F. W. WEI

JUST A FEW WORDS ABOUT THE OSWEGO APPLE—*Continued*

Rochester, New York, Jan. 6th, 1915.
It is a good looker.

WM. PITKIN,
Chase Bros. Co.

Yankton, S. D.
Sample apple came through in good shape. We consider it a good apple.

WHITING NURSERY CO.

Vincennes, Indiana, Jan. 5th, 1915.
The color is very fine, making a showy fruit.

W. C. REED.

Rochester, New York, Dec. 31st, 1915.
It is very fine in the matter of color and taste.

WESTERN NEW YORK NURSERY CO.

Brooklyn, N. Y., Dec. 30th, 1915.

The apple should be a valuable addition to the list of standard varieties; its color, regular shape and fine appearance will surely tell in market; its quality is good; its texture is not quite up to that of the Wagener, Delicious, and one or two other very fine grained sorts, but it is not far behind them in that respect; while I judge it will be far ahead of them in general shipping qualities. So many of these delicate sorts being too thin skinned and tender to bear handling, a fatal defect for general orchard purposes.

J. F. LeCLARE.

Topeka, Kansas, Jan. 1st, 1915.
We received the specimen apple in good condition. It is an apple of good color and shape, and the flavor is very pleasing.

J. H. SKINNER & CO.

Lawrence, Kansas, Jan. 2nd, 1915.
We thank you for the sample of the "Oswego" apple. We hope it may prove to be of great value. The color is rich and the flavor good.

MOUNT HOPE NURSERIES.

Painesville, Ohio, Dec. 30th, 1915.
I should say that it is of very fine quality and highly colored.

W. B. COLE.

Vincennes, Indiana, Jan. 13th, 1915.
We received sample of the new Oswego apple. It is fine and we think the flavor very excellent.

H. M. SIMPSON & SONS.

Geneva, New York, Jan. 9th, 1915.
Sample of Oswego apple received and we will ask that you enter our order for one dozen of these trees.

RICE BROS. CO.

Normal, Illinois, Dec. 30th, 1914.
Sample of the new apple Oswego came duly to hand. I was impressed with both the quality and color.

A. M. AUGUSTINE.

Rochester, New York, Dec. 29th, 1915.
Your favor of the 28th was received. The same mail brought the apple which we have tested, and found to be of very good quality indeed. If the tree is a good grower, and productive, it ought to be worthy of introduction.

C. M. HOOKER & SONS.

Manchester, Connecticut, Dec. 29th, 1914.
Received specimen of the Oswego apple. Color is all right and flavor good. It ought to be a comer, and as it is highly colored, it ought to command a high price in the market.

C. R. BURR & CO.

Rochester, New York, Jan. 2nd, 1915.
The apple you sent is beautiful in color, reminding me some in appearance of Jonathan. The quality is good and the size about that of Fameuse.

CHAS. A. GREEN.

Ottawa, Kansas, Jan. 2nd, 1916.
It is a fine appearing apple, and if the quality is equal to the appearance, we think there would be some demand for it.

A. WILLIS & CO.

NORCROSS CULTIVATOR-HOES AND WEEDERS

are among the most modern tools for garden and flowers. They are light and strong and cultivate closer to plants without injuring them than any other kind of implement, leaving the soil level, loose and untrampled.

Cost but little more than the common hoe, accomplish much more and better work with less labor. They cultivate the soil.

Detachable steel prongs, malleable head, extra high grade handles.

THREE SIZES AND PRICES

5-prong, 4-foot handle.....75c each
3-prong, 4-foot handle.....50c each
"Midget" 9-inch handle.....25c each

A BOON TO FRUIT GROWERS

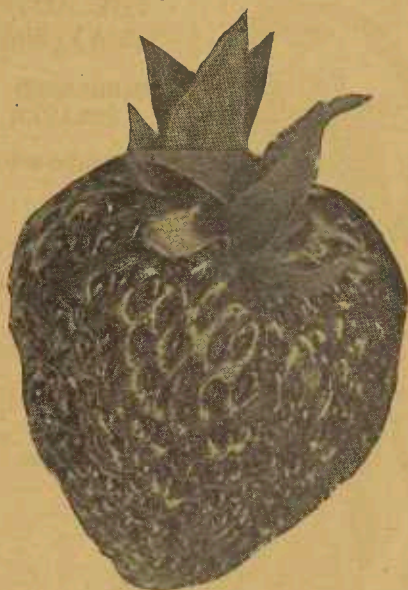

The discovery of a new method for the destruction of Insect-Pests so common to fruit-bearing trees, shrubs and plants. It is easy to use, not expensive, and will produce remarkable results. The most skeptical would endorse it after it is once tried.

The profit in fruit growing depends on the elimination of all Insect-Pests. Write us for particulars.

Farmer's Mascot (Per.)—A selection of plants from the Famous Mascot Strawberry. We have grown a great many varieties of strawberries, but we have never seen or grown a variety that impressed us more favorably than this variety did the past season. It is not a fall bearing variety, but it is the latest summer bearing variety we have. The past season they picked at the rate of 42 bushels to the acre at one picking, July 12th, and there were several good pickings after that date. The fruit is very large, deep red and very attractive in market, selling at 15 cents per quart when other varieties of the same date, the best of them, brought 12 cents per quart. It is a good yielder and a fine shipper. The plants are good growers, healthy and make good rows. We have a large stock of this variety in anticipation of a great demand for them.

I cannot impress upon patrons too strongly the importance of procuring a supply of this most valuable variety. From the fact that it does well all along down the Atlantic coast, as well as in our locality, I am led to believe that it will be a variety that will succeed most everywhere. It had the poorest chance of any of a long string of varieties that we fruited last year and yet it showed its superiority most pronouncedly. We pulled out the weeds from all our berries just before the fruiting season last year and the Mascot was the last variety to get weeded out. The leaves and fruiting stems and weeds were quite high when we got to them and a large percentage of the stems of berries were pulled off by the Italian weeder. In spite of this, the yield was immense and the berries were the finest of all the varieties we fruited. It was a question which was the best, this or the Fremont Williams, but the Mascot is a good deal later than the Fremont Williams. It produced several pickings before July 12th and several pickings later than that date, but July 12th was the banner day for the Mascot. Think of picking 42 crates from an acre of strawberries July 12th and selling them for 15 cents per quart. Do you know what you would do with the money? The very last berries we picked from the summer bearing varieties were gathered in late July from the Mascot, and the very same week, we began picking from the fall bearing varieties. Starting in with the Early Ozark, we had no let up of strawberry picking from June to November. Price of plants, 25 for 50c; 100, \$1.00; 1,000, \$8.00.

Farmer's Mascot

Lewiston, Idaho, Jan. 12th, 1916.

Later on shall want some Idaho red raspberries. We have a bed of your everbearing strawberries, and it is such a pleasure to pick the fruit all summer and fall.

MRS. E. W. EAVES.

Mixed Blackberry Plants We have a quantity (say 25,000) of mixed blackberry plants that got mixed while planting. These have fruited, and they are all good varieties, such as Snyder, Taylor, Eldorado and Ancient Briton. We cannot sell them for pure plants, but they are just as good for the man who wants to grow for his own use or don't care for particular kinds, if he only gets good blackberries. Price, 25 for 35c; 100, \$1.25; 1,000, \$10.

The Best Varieties of Strawberries

I am often asked which are the best varieties. I cannot answer this unless I know your locality and the conditions. Our soil is very strong and rich, with some clay in its make-up. It holds moisture well. The best varieties with us so far are Early Ozark, Bubach, Havermant, Ekoy, Early Jersey Giant, Ridgway, Fremont Williams, Big Joe, Mascot, Francis, Americus and Superb. Varieties that did almost as well were Wildwood, Champion, Glen Mary, Heritage, Chesapeake, Oom Paul, New Discovery, Wolverton and Sample. The three most profitable for market with us in 1916 were Early Ozark, Fremont Williams and Americus. The three kinds mostly grown for late shipment to New York City by Oswego County growers are Oswego, Champion and Glen Mary. Most commercial growers are not familiar with some of the most valuable newer varieties.

Hagamans, N. Y., Feb. 9th, 1914.

About 27 years ago my father, Mr. Shores, sent to you for strawberry plants and we had fine success with them.

MRS. WM. PAWLING.

Salix, Iowa, Jan. 26th, 1916.

Received my cockerles all O. K. Am well pleased with them and I thank you very much for package of seeds.

LEWIS LAMKIN.

Altoona, Pa., Feb. 7th, 1916.

I got a number of other catalogues, but think yours best. I received one thousand strawberry plants from you last May, 1915, in fine shape.

I. D. MIDDLESWORTH.

Columbus, Ohio, Dec. 20th, 1915.

The berry plants I received from you last fall were very satisfactory. Will need more in the spring and would be glad to have you mail me your catalogue giving prices.

W. H. LINGO.

The Truth About Poultry

Get the Facts by Reading

The One-Man Poultry Plant

Successful Methods of Men on Farms or Small Acreage. Complete in twelve parts; printed in one volume. By Dr. N. W. SANBORN.

Real work, with real poultry, on a real New England farm. This is a simple story of what has been done by a man, at forty-five years of age, town bred and city educated, getting out of practice of medicine, buying a small farm in the hill country, and making a success of the venture. Not only is the rearing of chicks and the management of adult fowl completely covered, but the interesting side issues of fruit growing, grain raising and the production of milk, that cannot be escaped on a real farm. You get rugged facts—rarely found in print. The truth about poultry as found in actual life on a one-man poultry farm.

YOU CAN DO THE SAME, BOOK TELLS HOW

Our Special Offer—The One-Man Poultry Plant, in twelve parts (book form), and the American Poultry Advocate, one year, for only 50 cents; book and Advocate, three years, for only \$1.00, if order is sent at once.

Our paper is handsomely illustrated, practical, progressive and up-to-date on poultry matters. Established 1892. Forty-four to 132 pages monthly. Fifty cents a year. Three months' trial 10 cents. Sample copy free. Catalogue of poultry literature free. Address

THE AUTO- SPRAY No. 1

COMPRESSED AIR SPRAYER

THE AUTO-SPRAY No. 1

COMPRESSED AIR SPRAYER

Upwards of 200,000
In Use

Diameter, 7 inches.

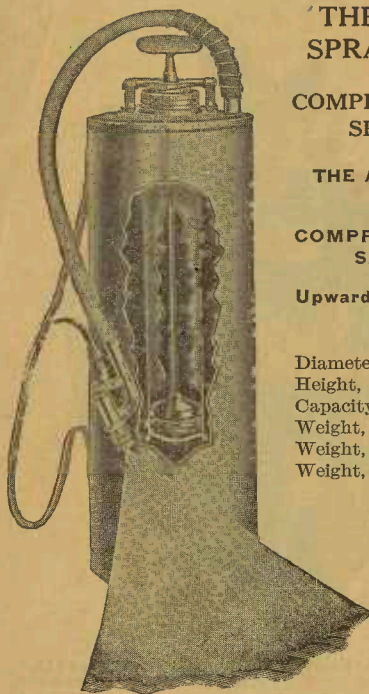

Height, 2 feet.

Capacity, 3 ½ gallons.

Weight, empty, 7 lbs.

Weight, loaded, 39 lbs.

Weight, shipping, 15 lbs.

The Auto-Spray No. 1 is the strongest and most simple in its working parts of any compressed air sprayer. Two pumpings of about 15 strokes on the plunger will discharge the contents under high and constant pressure. After pumping, the operator has nothing to do but direct the spray.

Device
for
Potato
Planting

Price, \$2.25

USES

For applying all insecticides, fungicides, disinfectants, cattle fly oil, whitewash and cold water paint.

EQUIPMENT

The Auto-Spray No. 1 is regularly equipped with carrying strap, 2 feet of ½-inch hose, fine spray nozzle, solid stream cap, and shut-off as selected, and at prices below. This equipment is satisfactory for ordinary low down work.

Auto-Pop No. 1—Automatic. Operating the lever opens or closes the valve and works a cleaning stem through the nozzle aperture. Saves both time and solution. This is the only nozzle that is absolutely self-cleaning.

Stop Cock—Requires no explanation.

EXTRA EQUIPMENT

Extension Pipes—Brass. Two-foot lengths. For tree work two or three lengths are commonly used. The extensions screw into one another and connect direct to the shut off. The nozzle goes on the far end of the extension.

Two Row Attachment.—All brass. The nozzles, 9 ½ inches apart, are arranged at such an angle that they properly cover two rows at one operation.

Brass Elbow—For reaching the under side of leaves. Will fit either the shut-off or extension.

Brass Strainer—Necessary in the proper preparation of solutions.

GUARANTEE

We warrant the Auto-Spray No. 1 to be perfect mechanically and to give satisfaction in every case and will refund the purchase price to any dissatisfied customer within ten days after the receipt of the machine.

Frederick's Transplanter supplies a long needed tool for large or small farmer, nurseryman and greenhouse man; and this with the

STANDARD POTATO PLANTER

Enables one man to do the work of three ordinary men. Plants can be placed along a line or in squares to cultivate both ways.

The Frederick Transplanter is so effective and simple in action that it does not require an expert. There is nothing to get out of order and the cheapest kind of laborers quickly become proficient.

Greenhouse men, who transplant small potted plants not over 2 ½ inches across, find it one of the greatest labor savers. Tomato, Tobacco and Cabbage growers say they do not know how they ever got along without it.

WHY YOU NEED IT

When the time comes for transplanting, the work must always be done quickly.

When the user has one or more plant setters, the saving in labor alone will quickly pay for the setters, say nothing of the increased number of plants that can be put out in an hour.

Each and every one is sold on a guarantee that it will set any stiff plant four inches or longer, with the understanding that if they are not perfectly satisfactory the planter can be returned at our expense and full purchase price refunded.

HOW IT WORKS

Place the plants in a basket or box arranged so a strap goes over the right shoulder, leaving it convenient for reaching in and taking out the plant with the left hand.

With the left hand drop the plant, roots down, in top of transplanter, then force the point of the jaws into the ground the required depth, push forward and pressure of thumb on lever puts the tool in position for the next plant.

Provision is made to plant either shallow or deep by changing brace, and for larger or small plants by changing lever bolt.

THE COLUMBIAN RASPBERRY

above is a picture of a Columbian Raspberry bush trained and tied to stakes, which has produced a bushel of fruit in one season. We know of no raspberry more valuable than this, grown in top soil, in the pressure of the next season. It is unsurpassed for canning and good enough for table use.

L. PULASKI, N. Y.
